

Bharath K

Bangalore, IND | P: +91 9008099880 | 8harath.k@gmail.com | 8harath.me | linkedin.com/in/8harath

EDUCATION

Jain (Deemed-to-be University)
Bachelor of Computer Application

Major in Computer Science; Minors in Data Analysis
Cumulative GPA: 8.9

Bangalore, IND
Expected May 2027

EXPERIENCE

GenXReality

Artificial Intelligence Intern

Hyderabad, IND
Dec 2024 – Present

- Built a full-stack website with interactive UI and optimized backend performance.
- Developed text-to-3D and 2D-to-3D pipelines for VR headset integration and immersive environments.

Monospace

Artificial Intelligence & Machine Learning Intern

Jaipur, IND
Jan 2025 – March 2025

- Used Hugging Face models and LiDAR to develop 2D-to-3D image transformation pipelines.
- Integrated Stable Diffusion for prompt-based image generation, embedding it into a functional AI product.

1M1B

Data Analyst Intern

Bangalore, IND
Nov 2024 – March 2025

- Collected and analyzed sustainability data on emissions, fuel, energy, and waste management.
- Created a custom Tableau dashboard to visualize data and propose AI-driven sustainability solutions.

PROJECTS

Automated Document Generation using Fine-Tuned LLaMA

Aug 2024

- Fine-tuned LLaMA on past assignment datasets to generate academic documents for various topics.
- Collected and processed two semesters of student data to enhance document accuracy and relevance.

Online Voting System with Full-Stack Implementation

Nov 2024

- Developed a secure online voting system using HTML, CSS, JavaScript, Python, and SQL.
- Integrated frontend and backend for real-time vote casting, authentication, and database management.

ACTIVITIES

Navarith Student Forum

Research and Development Member

Jain, BCA
Oct 2024 – Present

- Conducted research and development to enhance the forum's initiatives, driving innovation and idea generation.
- Collaborated with team to implement solutions and strategies for improving forum activities and events.

CERTIFICATIONS

Artificial Intelligence & Machine Learning: Generative AI (DeepLearningAI, Google, IBM), ML (University of London), Prompt Engineering (Google, Vanderbilt).

Programming & Software Development: Python, Java, C, SQL (University of Michigan, LinkedIn).

Data Science & Visualization: Data Analytics, Tableau, and Visualization (Google, IBM).

Networking & Blockchain: Computer Networking (Google), Blockchain & Software Engineering (University of Michigan).

OTHERS

Technical Skills: Programming: Python, Java, C, C++, SQL. AI/ML: Prompt engineering, fine-tuning LLMs, RAG, PyTorch, TensorFlow, Stable Diffusion. Web Dev: Full-stack, REST APIs, Flask. Data: Tableau, NumPy, Pandas, visualization. Cloud/DevOps: AWS, Docker, Git. Other: LiDAR, 2D-to-3D, VR integration.

Awards: Best Library User (2023), Inter-College Chess Championship (2023), Best Since Project (2020)

Interests: Reading Philosophy, Listening to Podcasts, Playing Chess, Trading Crypto, Browsing the Internet.
