

Q What is Prasanna's view of modern resistance? Explain

Machine civilization was born two centuries ago. It did not come to our awareness as soon as it was born. As a result, it took a lot of time to realize the nature of its function. As automated production methods solidified, as machine-made goods disappeared, as peasants migrated to cities, as the rural poor joined factories as laborers, as markets were reshaped, as forests disappeared, as cities grew, machine civilization became the fabric of our life. Then the effect was felt. Then it started to be understood by everyone everywhere. No new lifestyle can be implemented easily. They are resistant to old life style. This clash of old and new is a cultural clash of Virat's style. In literary criticism, this tikka is identified as the tikka of heritage and modernity. Therefore, to understand the

various dimensions of the conflict between tradition and modernity, it is appropriate to observe the art, literature, folklore and popular media of the 20th century. One can see this point in any twentieth-century novel, novel, drama, or movie: Whether the work you see is original or mediocre, whether it's written by maestros like Masti, Sti Kuvempu, Karanta, Bayndre, popular film directors Kanagal Puttanna or Siddhalingaiah. Be that as it may, whoever it may be, the material of all works is a mixture of heritage and modernity. More sharply than in any other era, heritage and modernity have come face to face in the twentieth century. Even now, even in the twenty-first century, Tikka Ta is not over. Households and mind

It continues to capture minds.

When automatic machines were born, the capitalist system was also born, and these two fed each other and grew, in a sense, they were like twins. Machines needed a base called factories, steam power was needed, and coal mines were needed to make steam. Cheap wages were paid to work in the mines. He took more capital than anyone else. Capitalism provided all this. Everything was provided, the machinery grew, and it grew itself.

Capitalism has come to an end. But, what is the opposition to capitalism?

Yantra did not succeed in creating an alternative to civil society. Many countries in the world were lagging behind until now. Now, in the last fifteen years, it has grown up to make everyone jealous. The truth is that all these have been left behind until now because they have resisted the machine civilization.
