- Microsoft PowerPoint is a powerful slide show presentation program. It is a standard component of the company's Microsoft Office suite software, and is bundled together with Word, Excel, and other office productivity tools. The program uses slides to convey information rich in multimedia.
- A PowerPoint slideshow (PPT) is a presentation created on software from Microsoft that allows users to add audio, visual and audio/visual features to a presentation. It is considered to be a multimedia technology and also acts as a tool for collaboration and content sharing.
- PowerPoint allows presenters to translate complex ideas, facts, or figures into easily digestible visuals. Visual representations of information activate the right hemisphere of the brain, which allows viewers to interpret, expound, and engage with what they're seeing.

Effective presentation

➤ Key steps

➤ Content

- ✓ Technical
- ✓ Organization
- ✓ Visual aids: legible, short and simple

➤ Delivery

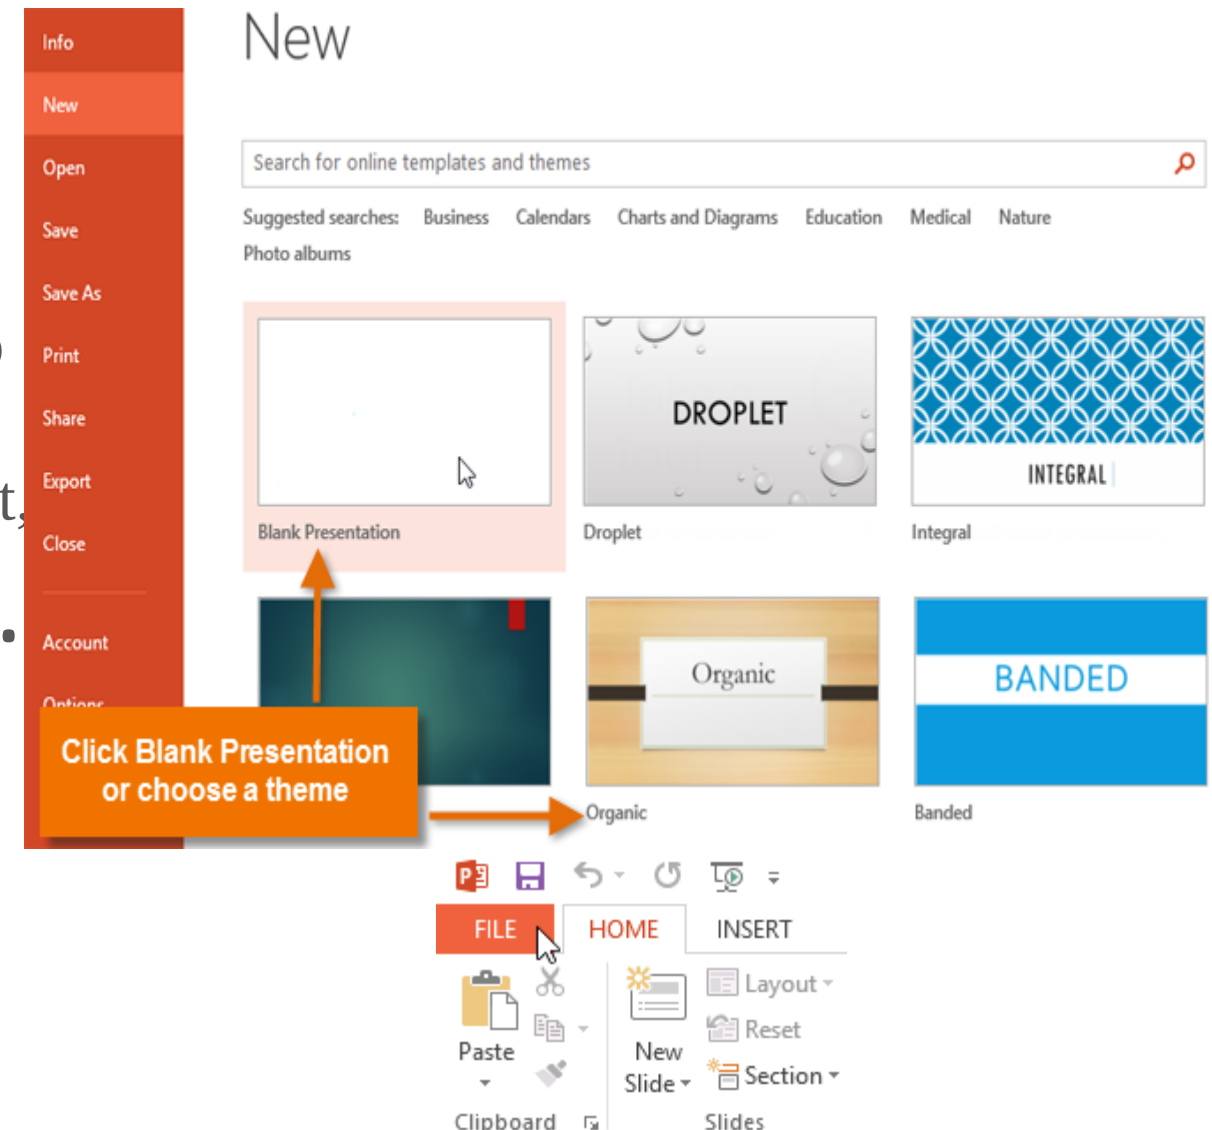

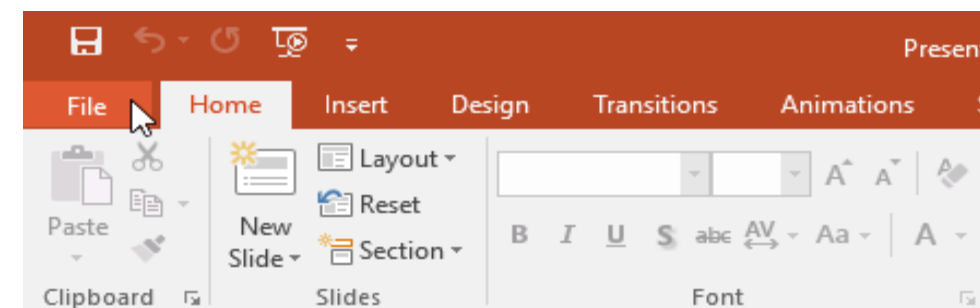

- ✓ 5 components of presentation
- ✓ Nonverbal communication
- ✓ Keep audience interested
- ✓ Panic control

Attending conference

7 Ps of effective presentation

Create a presentation

- Open PowerPoint.
- In the left panel, select New.
- Select an option: To create a presentation from scratch, select Blank Presentation. To use a prepared design, select one of the templates. To see tips for using PowerPoint, select Take a Tour, and then select Create, •

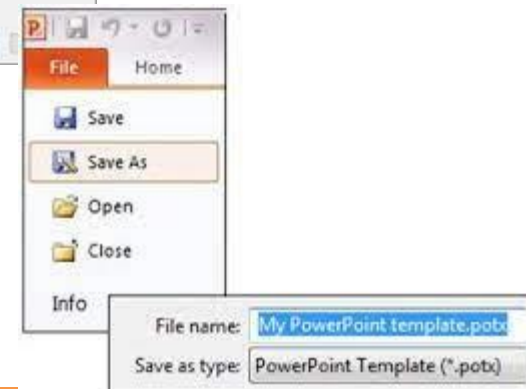

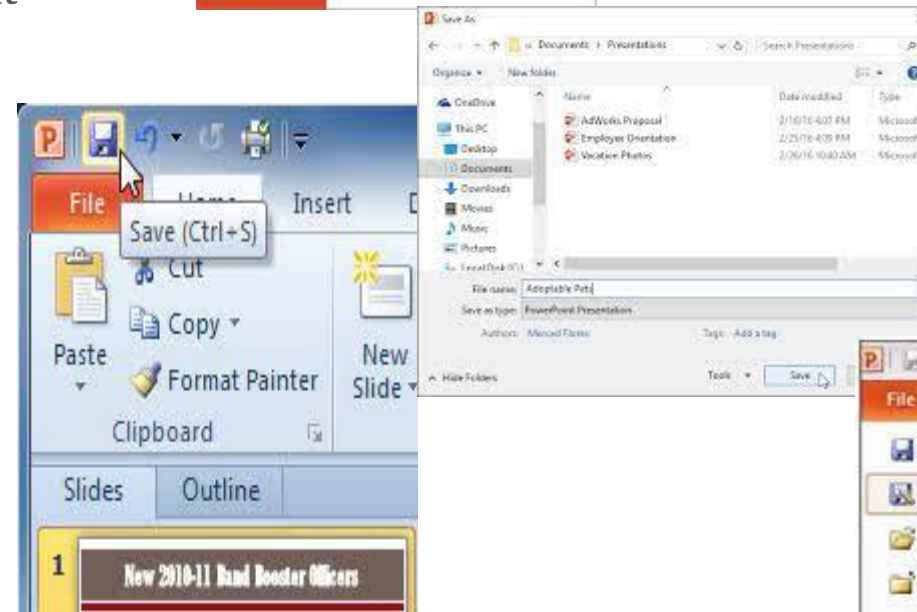

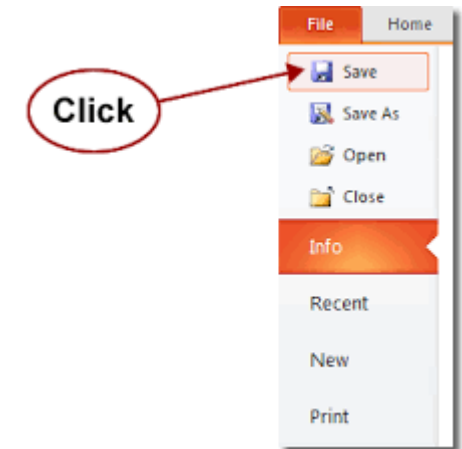

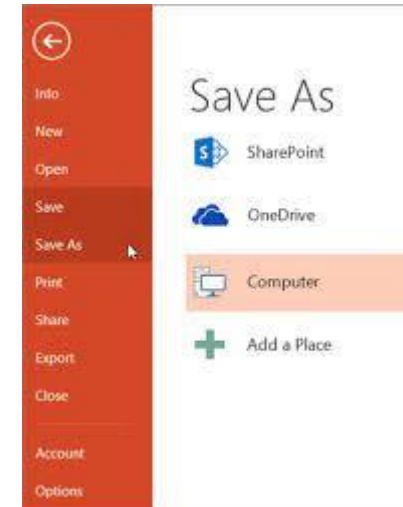

Save your presentation file in a different file format

- On the File tab, select Save As.
- Under Save As, do one of the following:
- Under Recent Folders, select Browse, pick a path and file folder, and then name the file.
- In the Save as type list, pick the file format that you want.
- Select Save.

OR

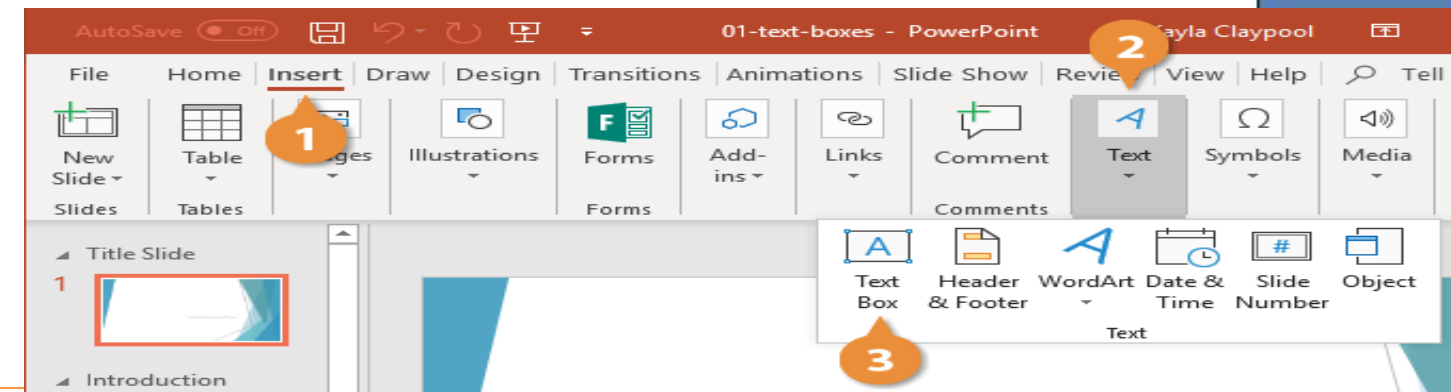

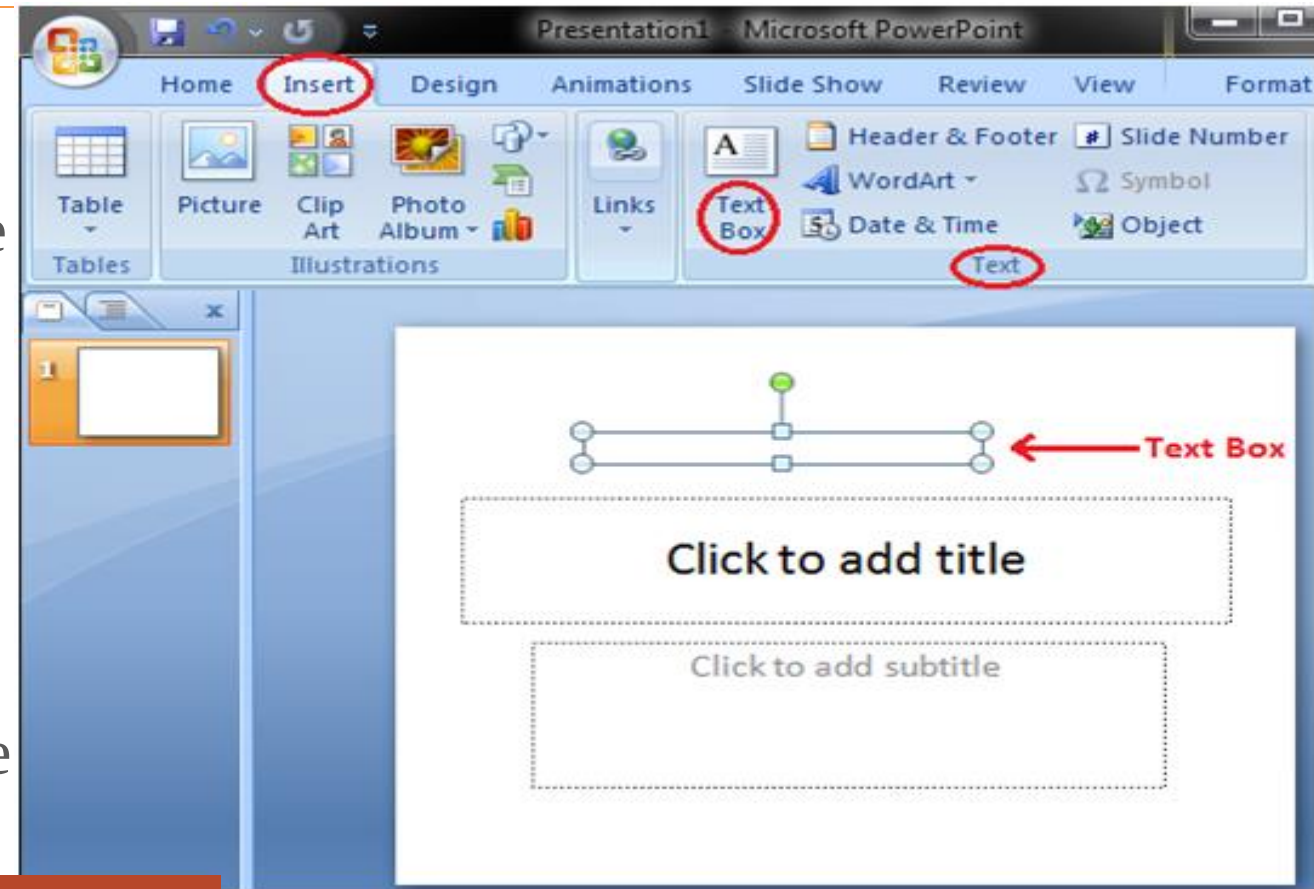

- Click FILE > Save, pick or browse to a folder, type a name for your presentation in the File name box, and click Save. Save your work as you go. Hit Ctrl+S often.

text box is a special type of drawing object that lets you insert and position text anywhere in a presentation.

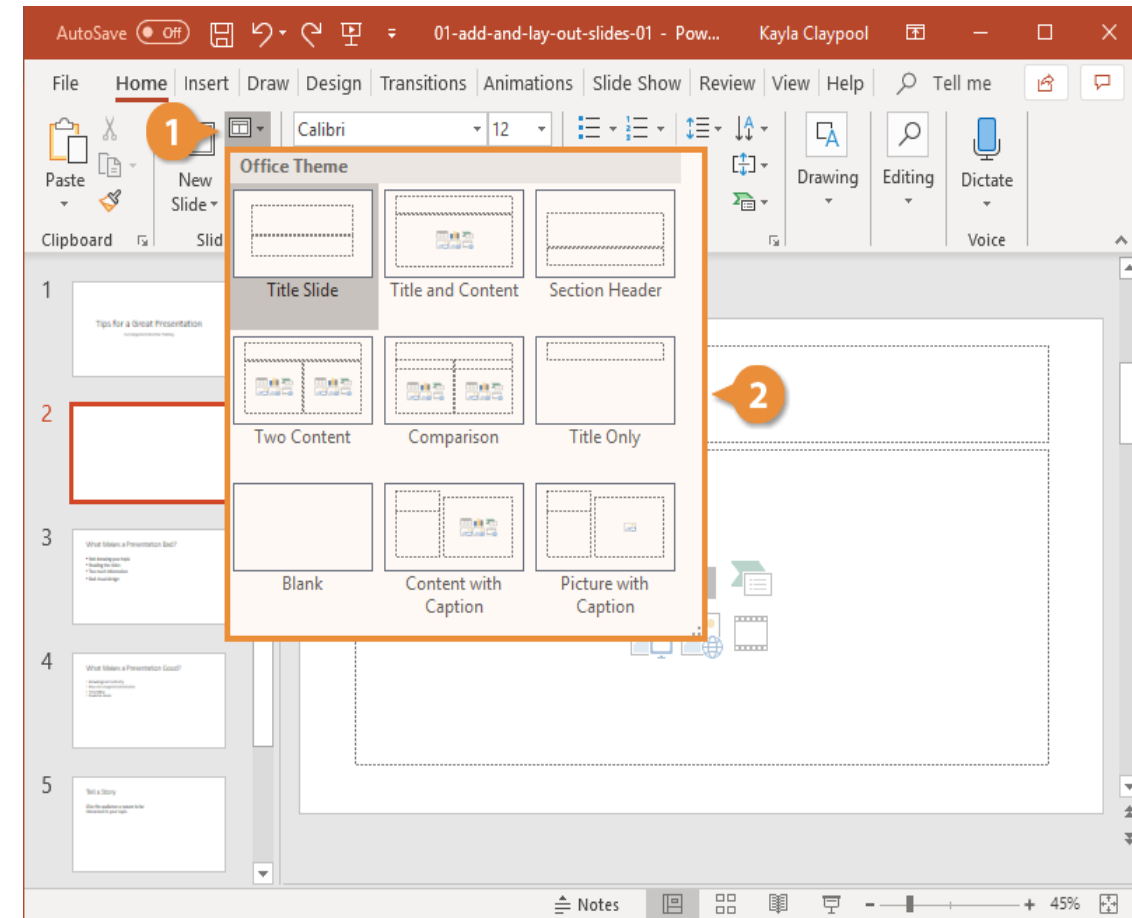

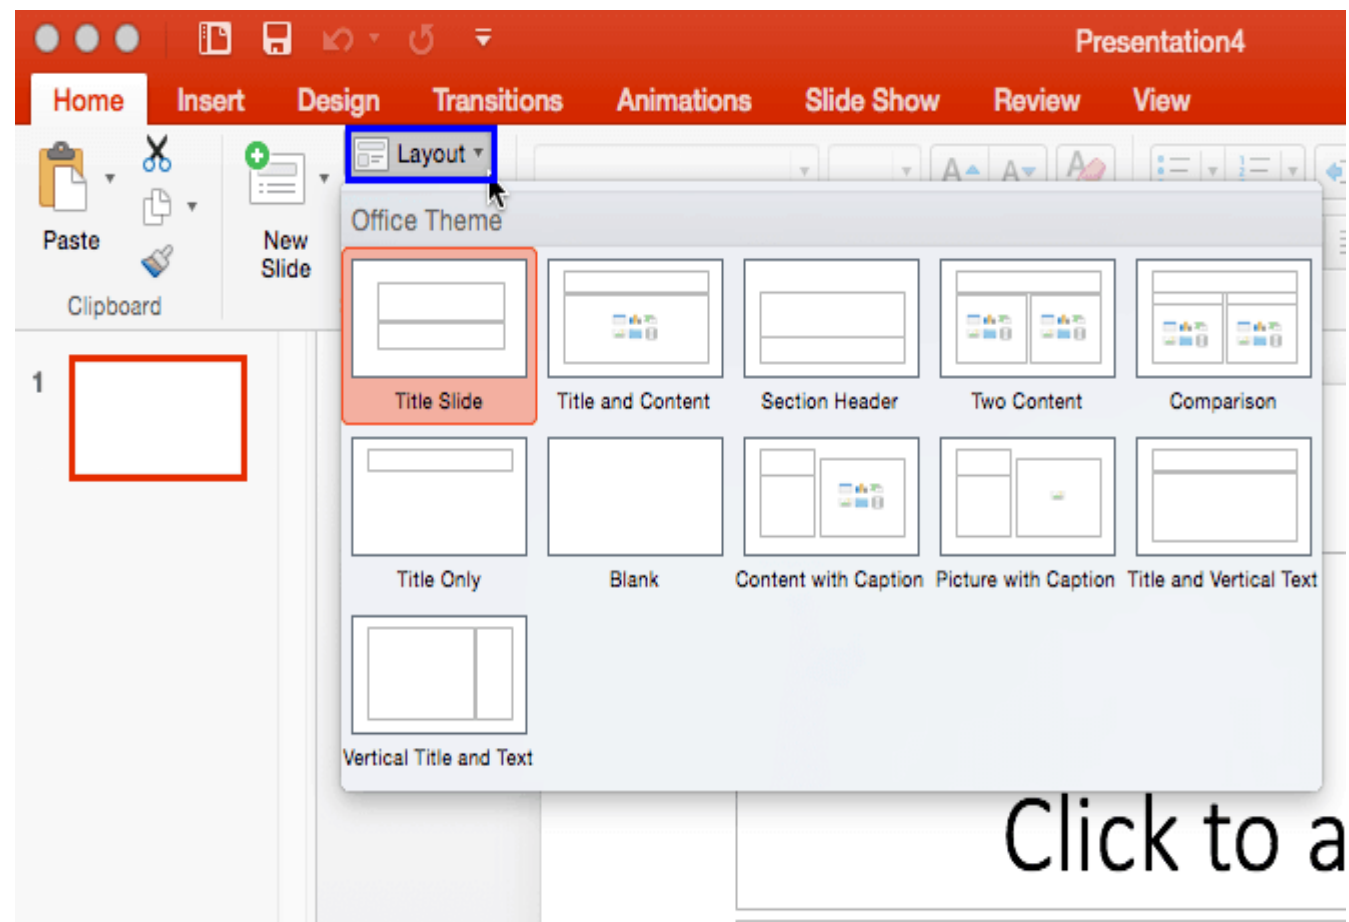

How to Add a Text Box in PowerPoint

- Click the Insert tab on the ribbon.
- Expand the Text group if necessary.
- Click the Text Box button.
- Click and drag to create the text box. Type the text you wish to add.

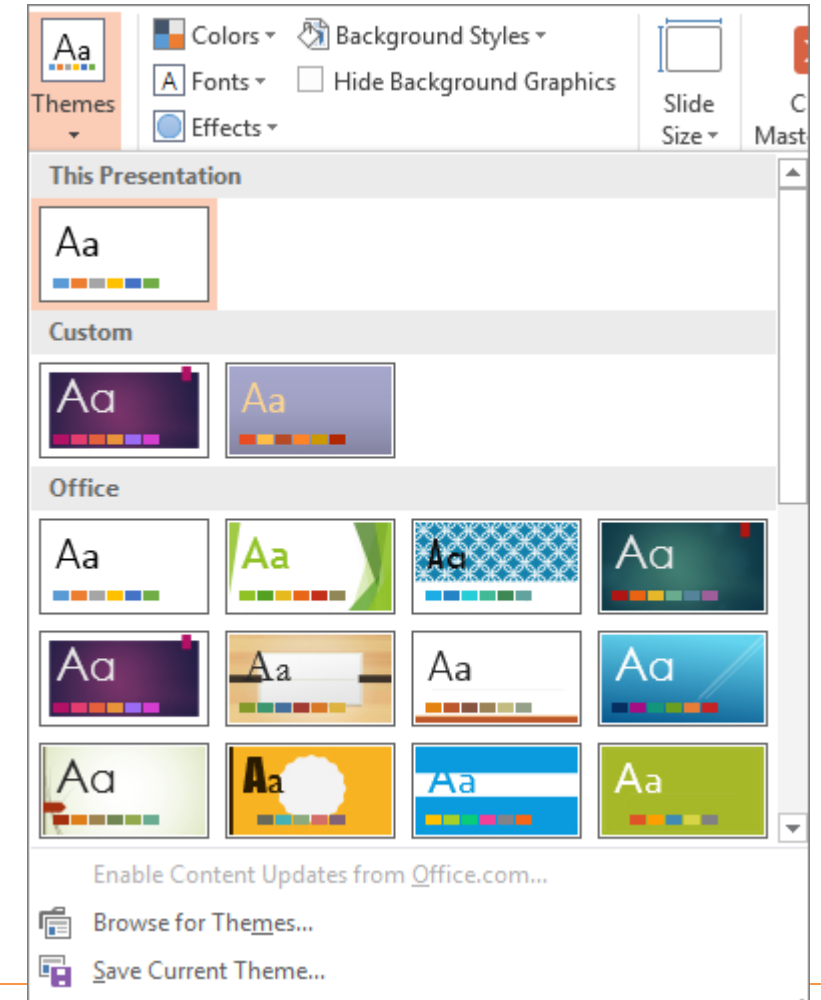

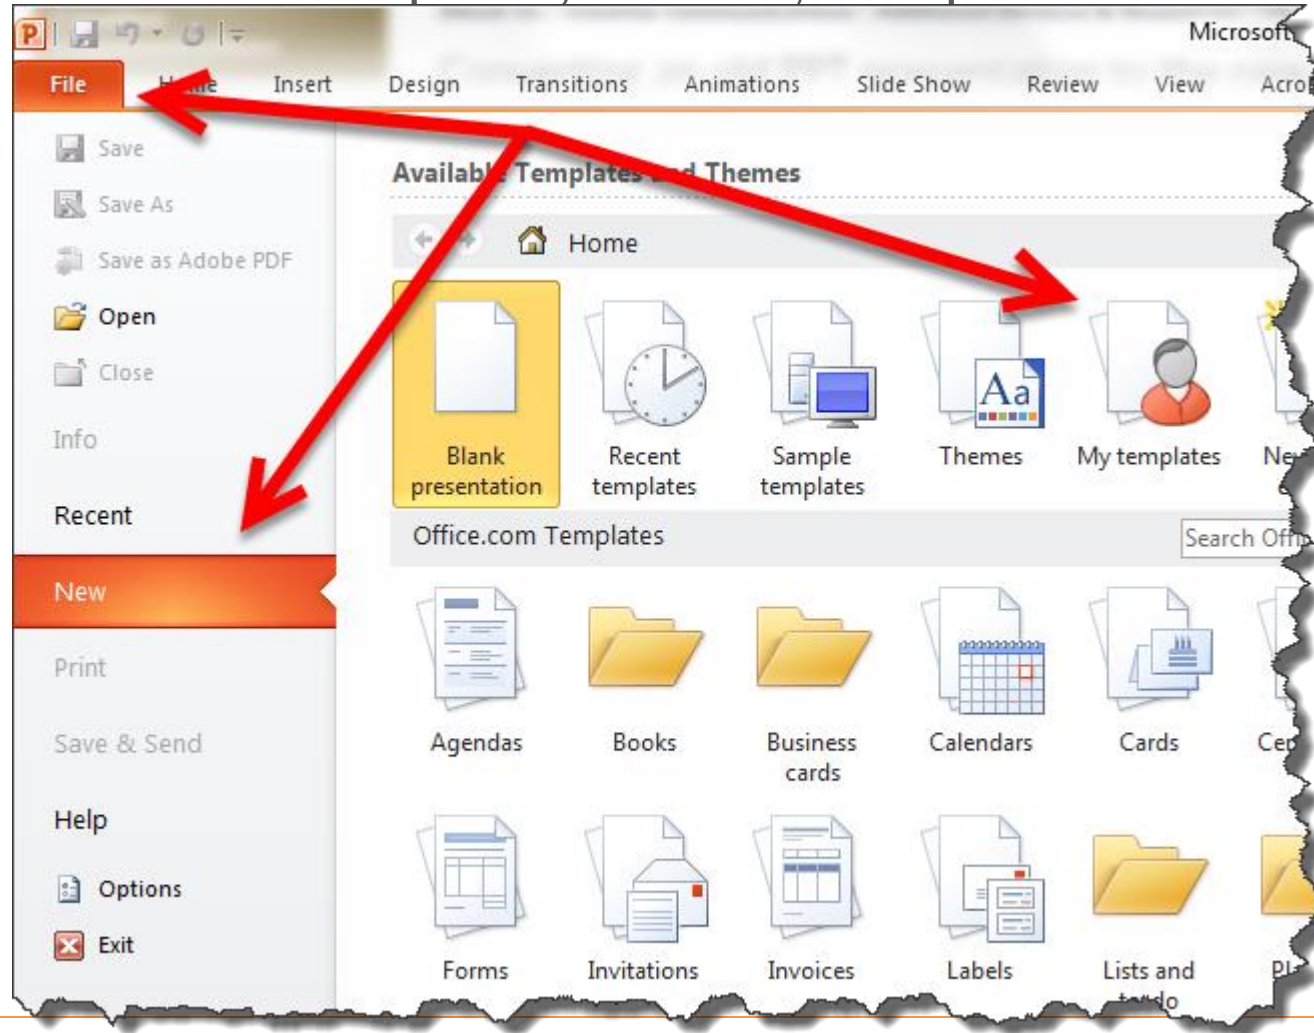

Changing a slides Layout

- Select the slide that you want to change the layout for. **Select Home > Layout.** Select the layout that you want. The layouts contain placeholders for text, videos, pictures, charts, shapes, clip art, a background, and more.

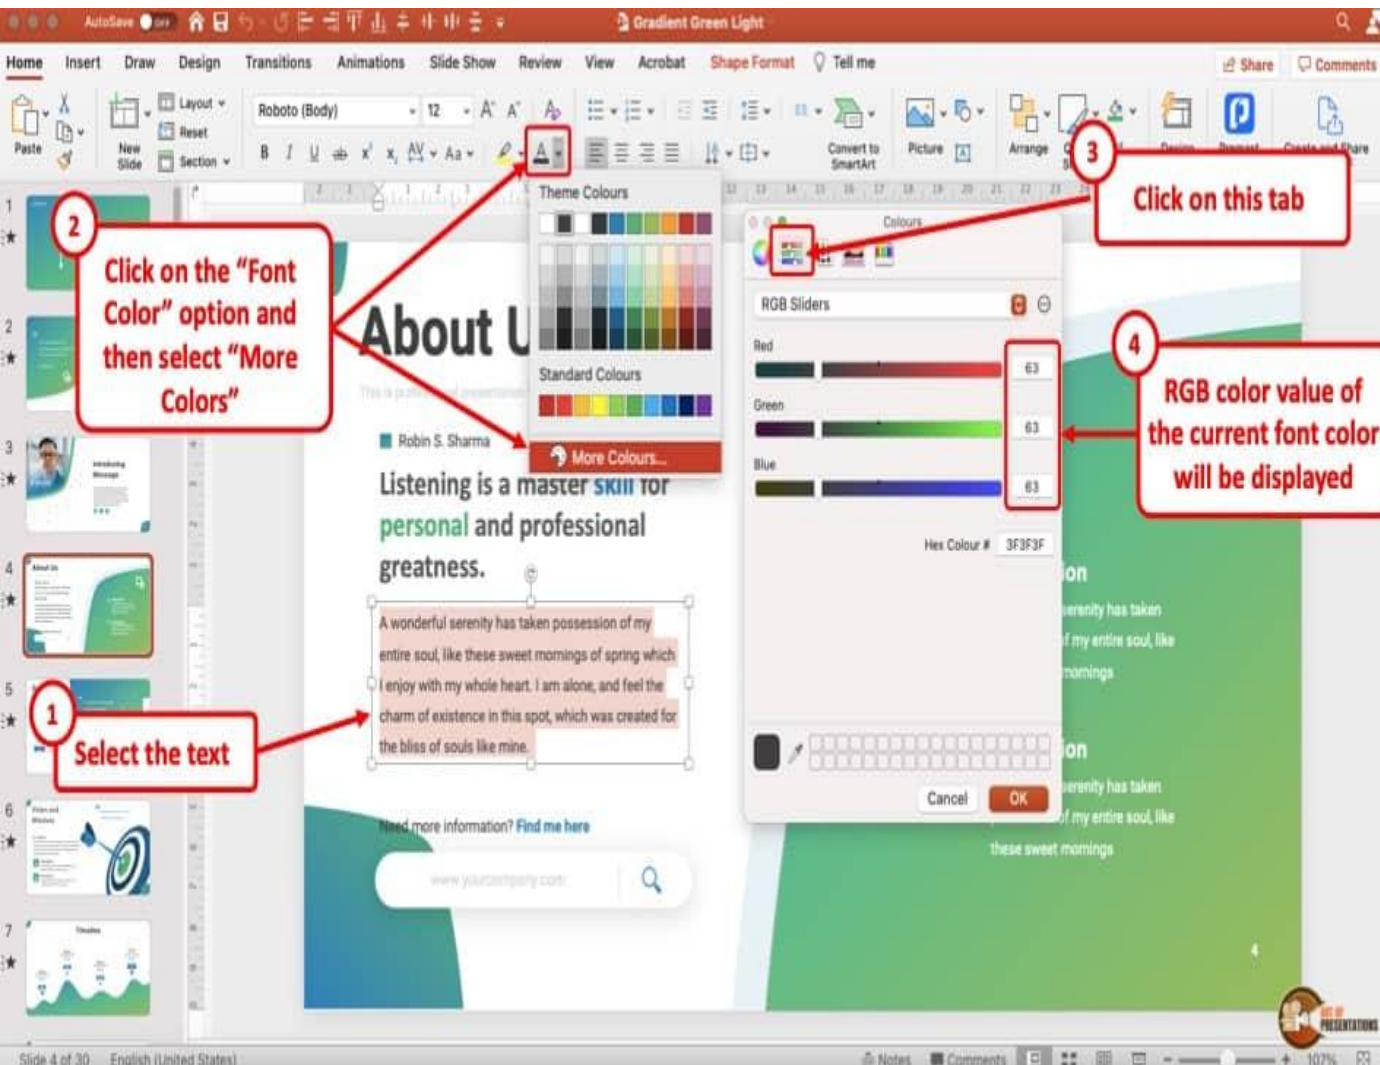

- Select File > New from Template. The PowerPoint Presentation Gallery opens. On the left, under Templates, click My Templates. Select a template file and then click Choose.

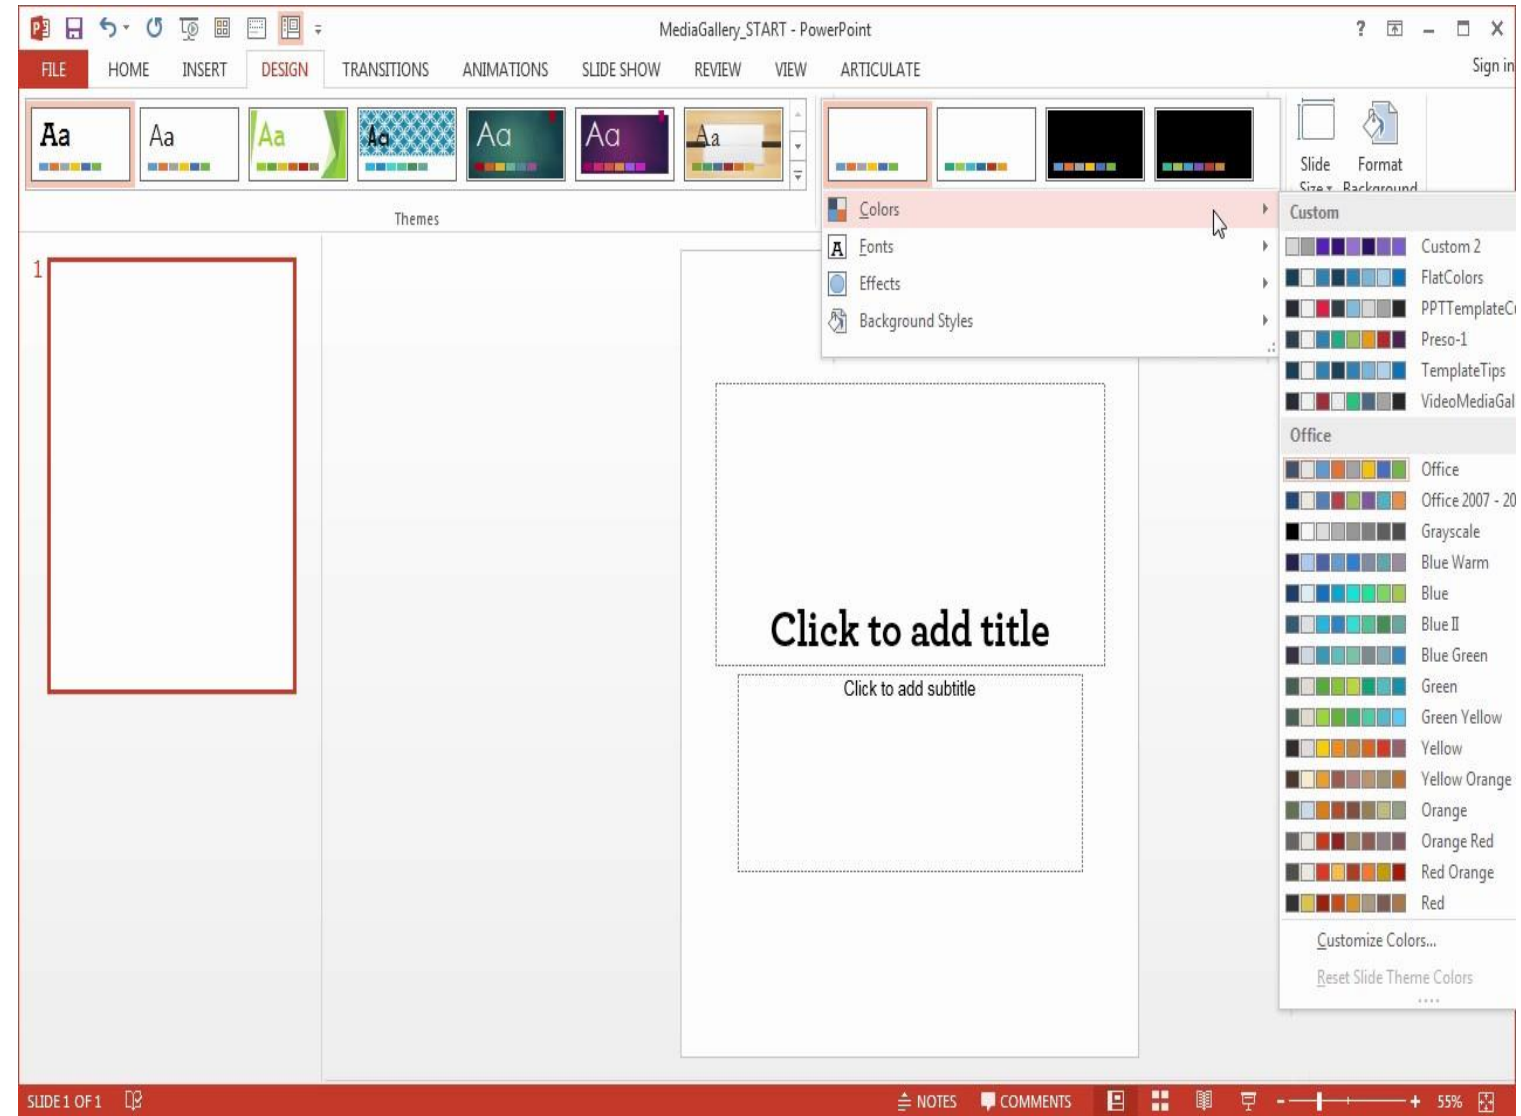

Changing Colours, fonts and effects

- In the left thumbnail pane, select a layout that contains the text you want to change to a different color. Select the text on the layout that you want to change. **On the mini toolbar that appears, choose Font Color, and then select the color you want to change the color of the text to.**

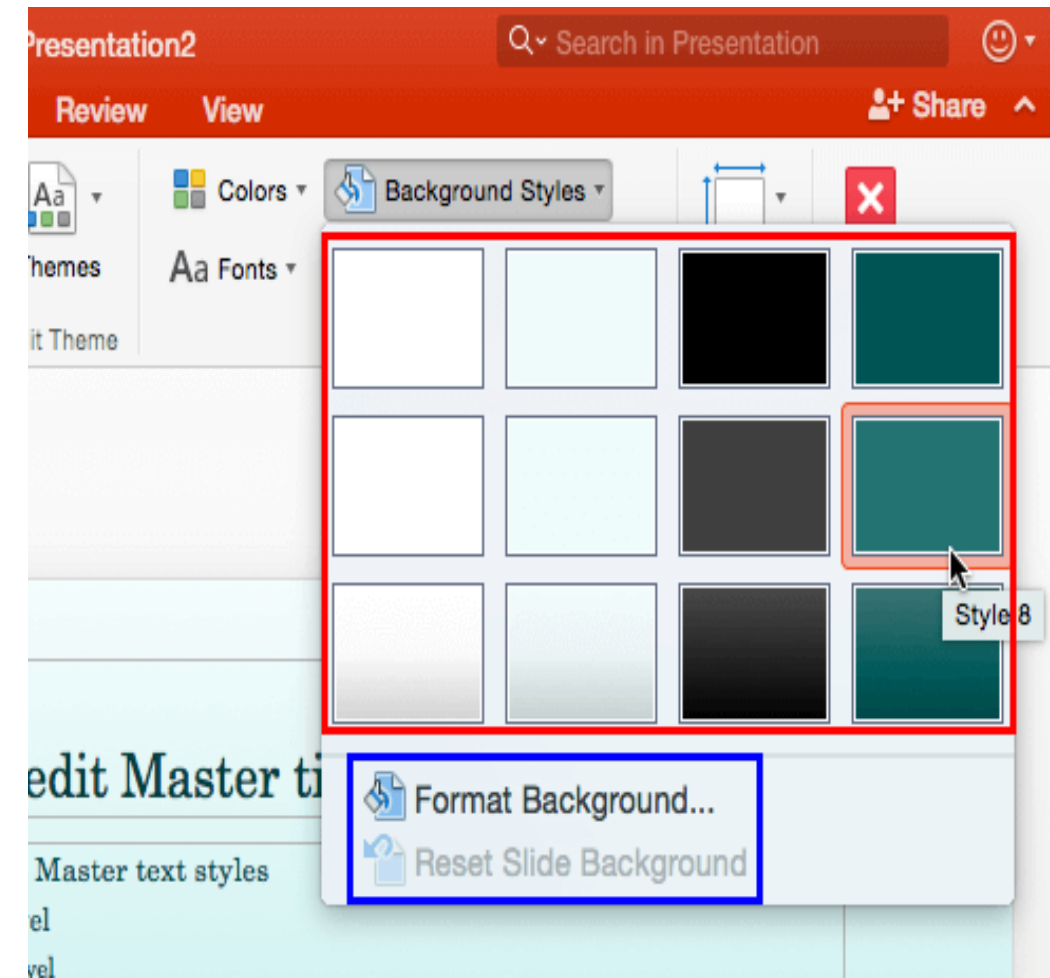

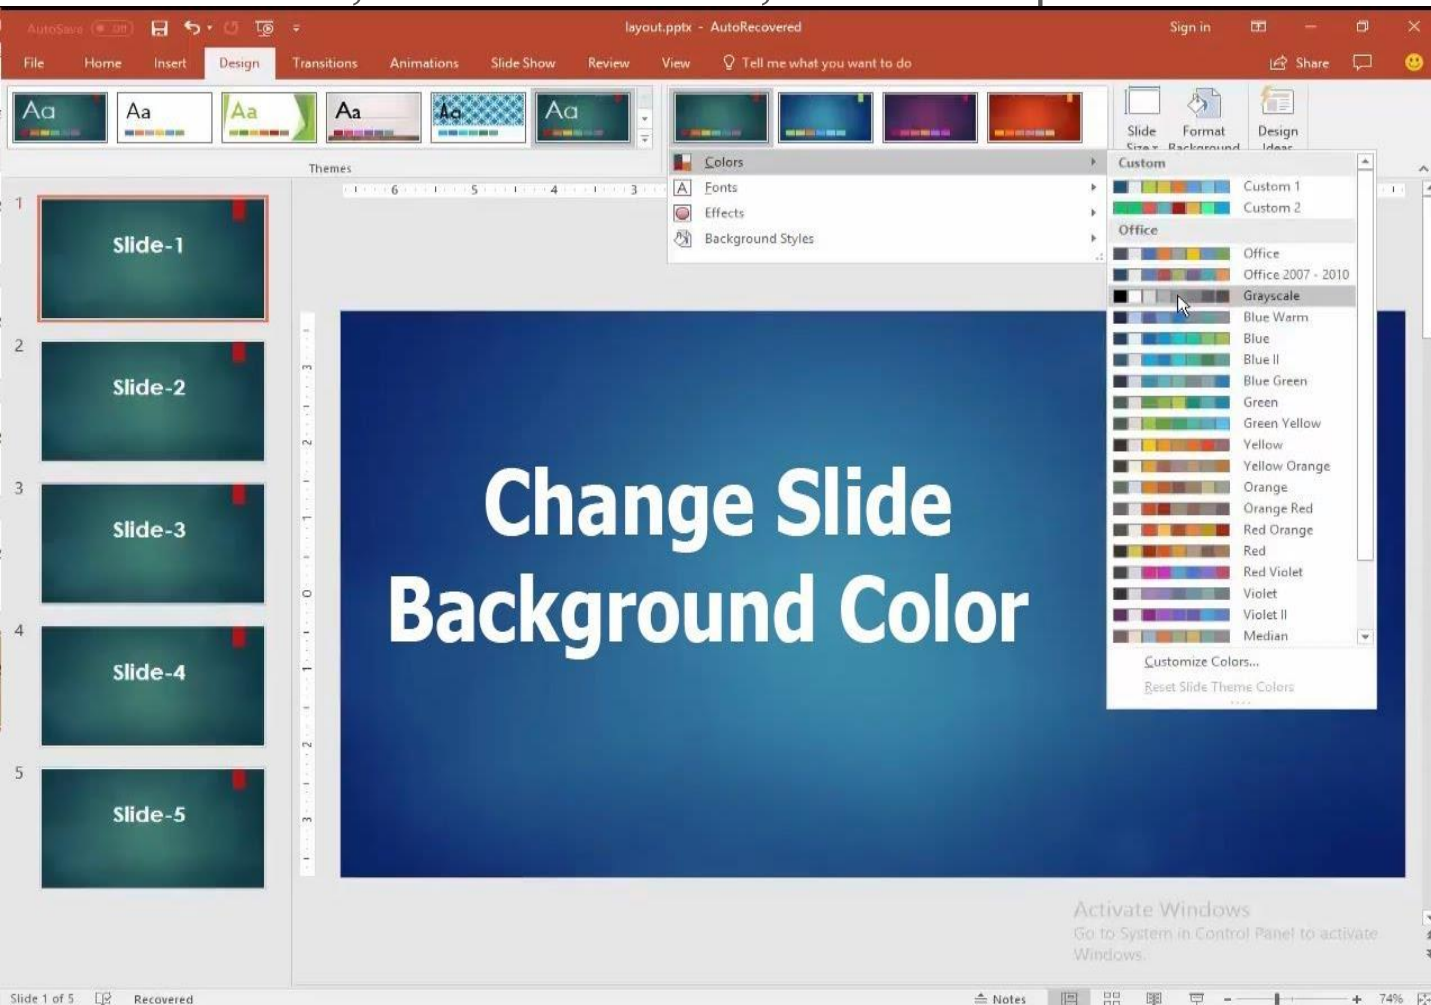

Create a new theme color

- On the Design tab, click the arrow under Variants, and point to Colors.
- Click Customize Colors.
- Click a color box that you want to change. ...
- Click a new color in the Colors dialog box.
- Repeat steps 3 and 4 for each color you want to change.
- Close the Colors dialog box.

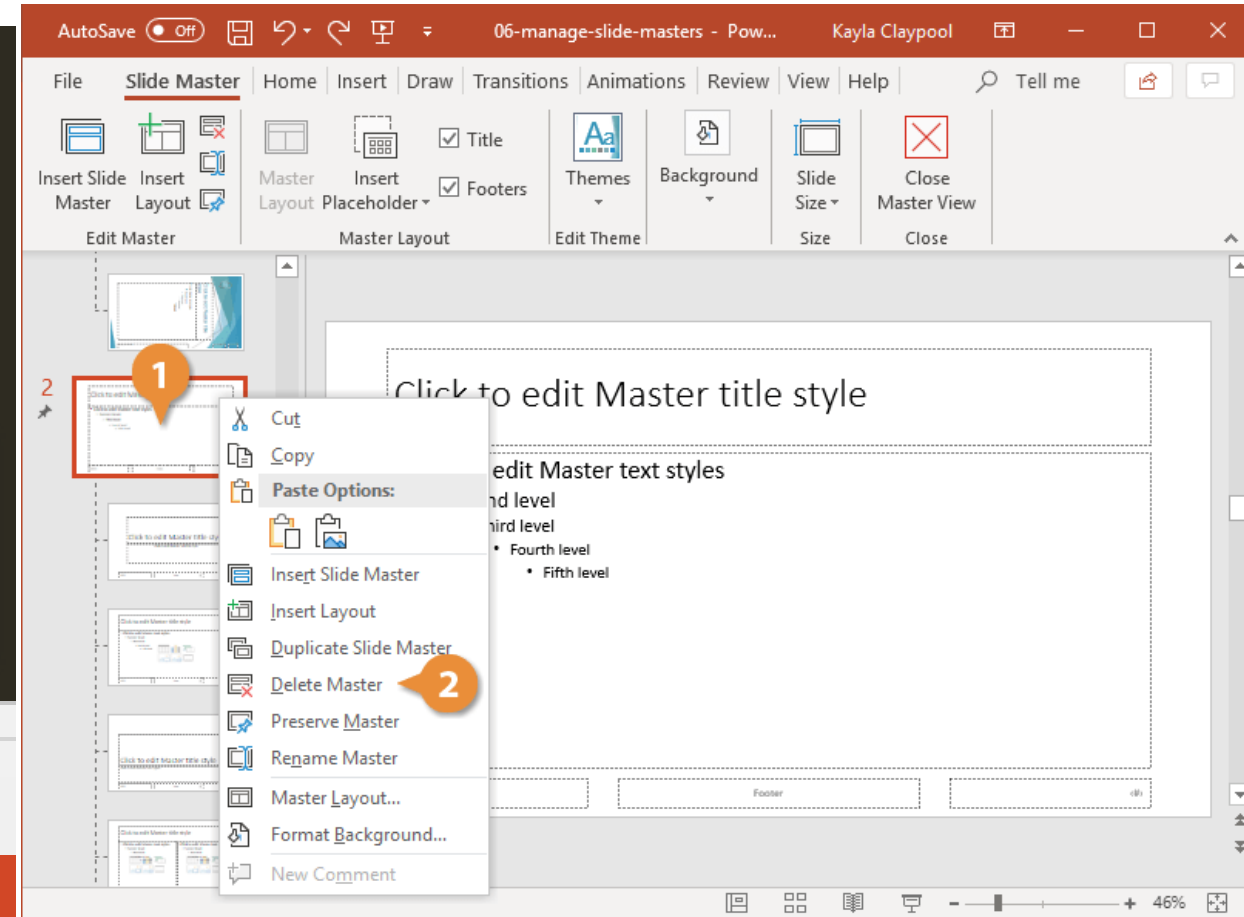

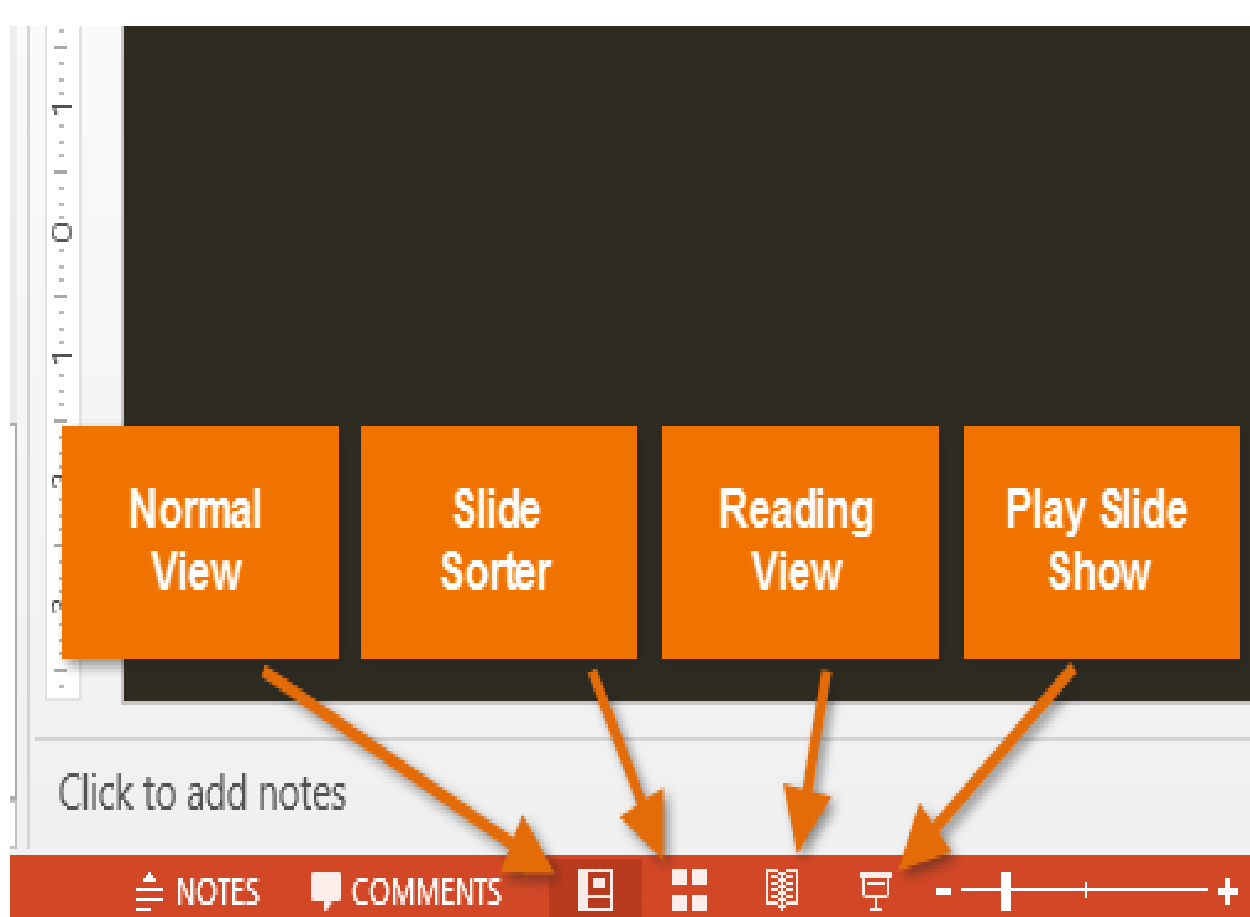

, Changing the background

- On the View menu, click Normal, and then in the navigation pane, click the slide or slides that you want to change. On the Design tab, in Customize, click Format Background. Click Fill, and then click the Solid, Gradient, Picture or Texture, or Pattern option. Choose the background fills that you want.

- Click to select the master slide, and then click Master Layout on the Slide Master tab. To show or hide the title, text, date, slide numbers, or footer placeholders on the slide master, check the boxes to show, or clear the boxes to hide the placeholders.

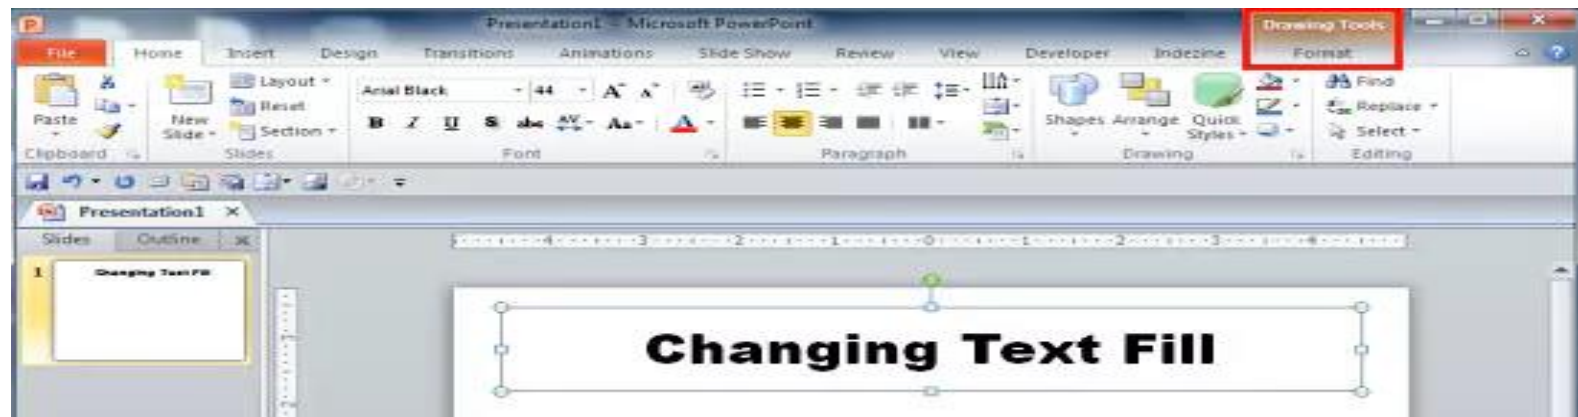

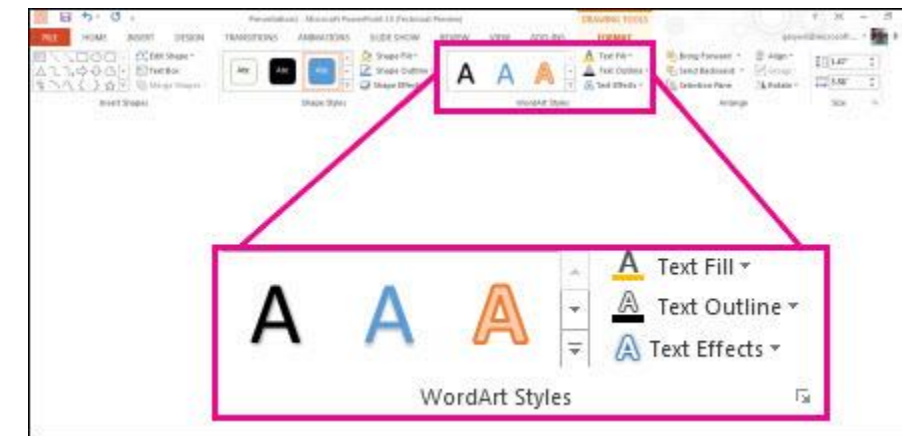

Changing the font, font size, font color, text fill

On the Home tab, choose **Font Color**, and then select the **color** that you want to **change** the **color** of the **text** to. Use the **Font Color** options to **change** the **color** ...

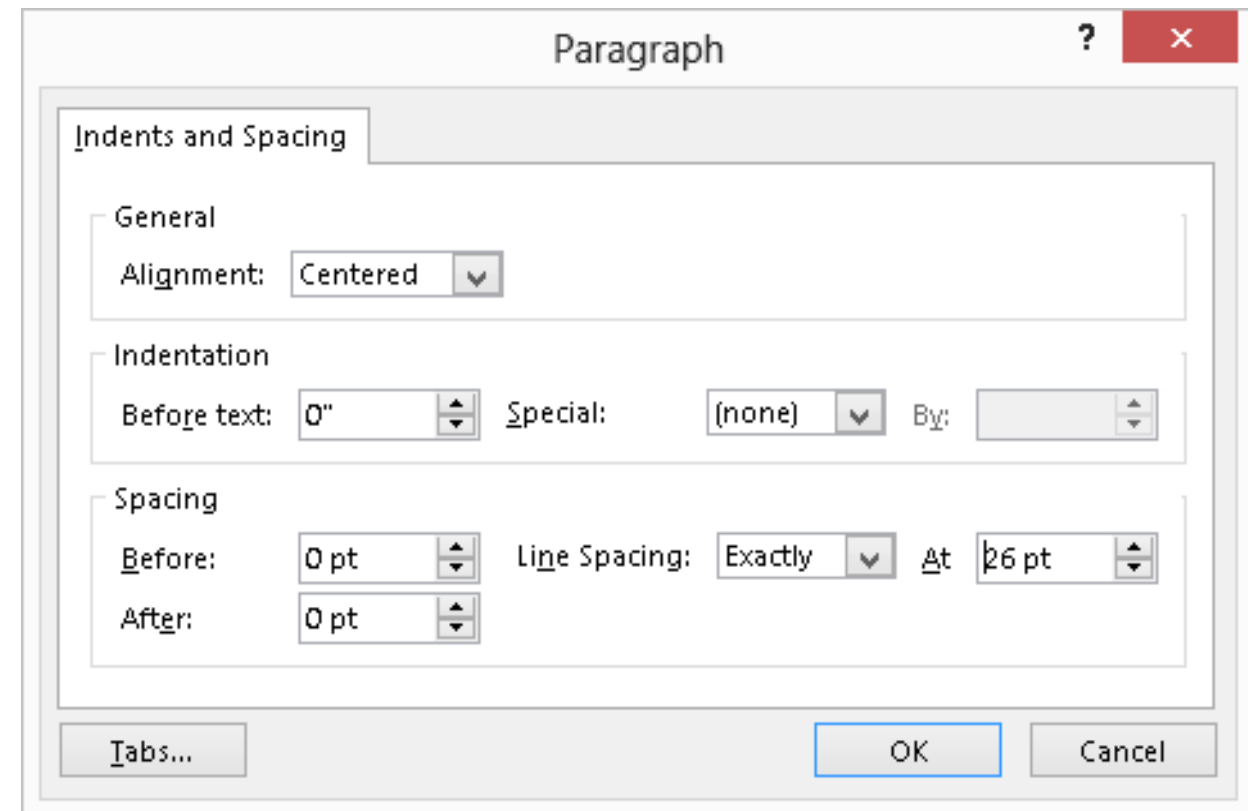

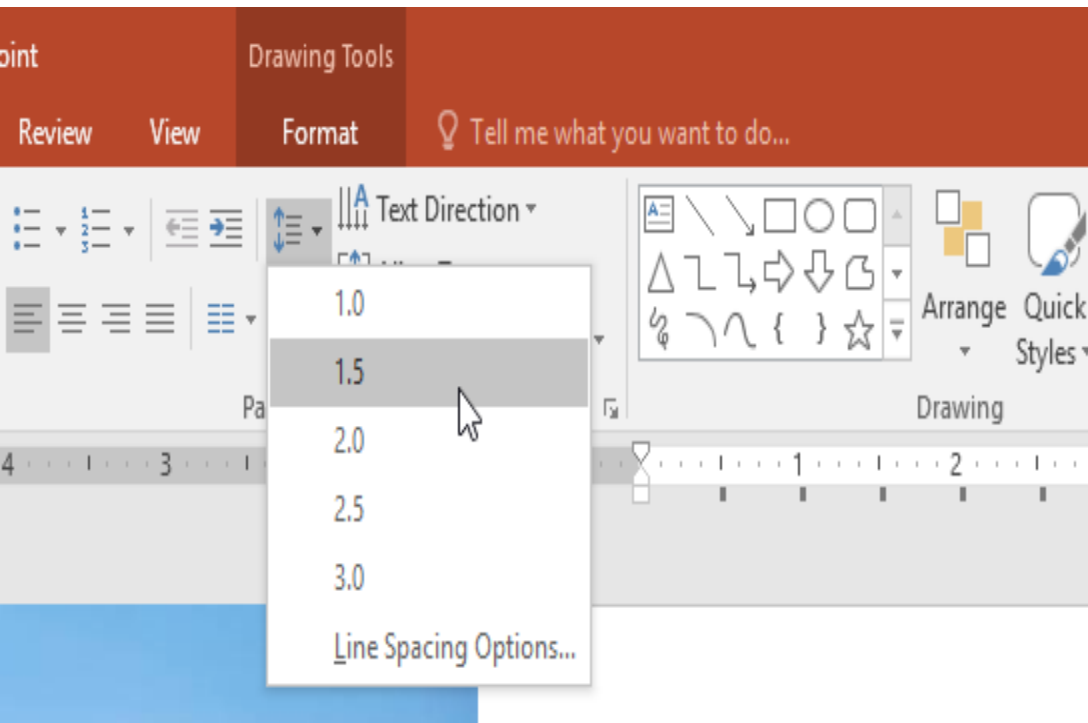

If you are using Excel or PowerPoint

Under Drawing Tools, on the Format tab, in the WordArt Styles group, click the arrow next to Text Fill, and then do one of the following. To add or change a fill color, click the color that you want. To choose no color, click No Fill.

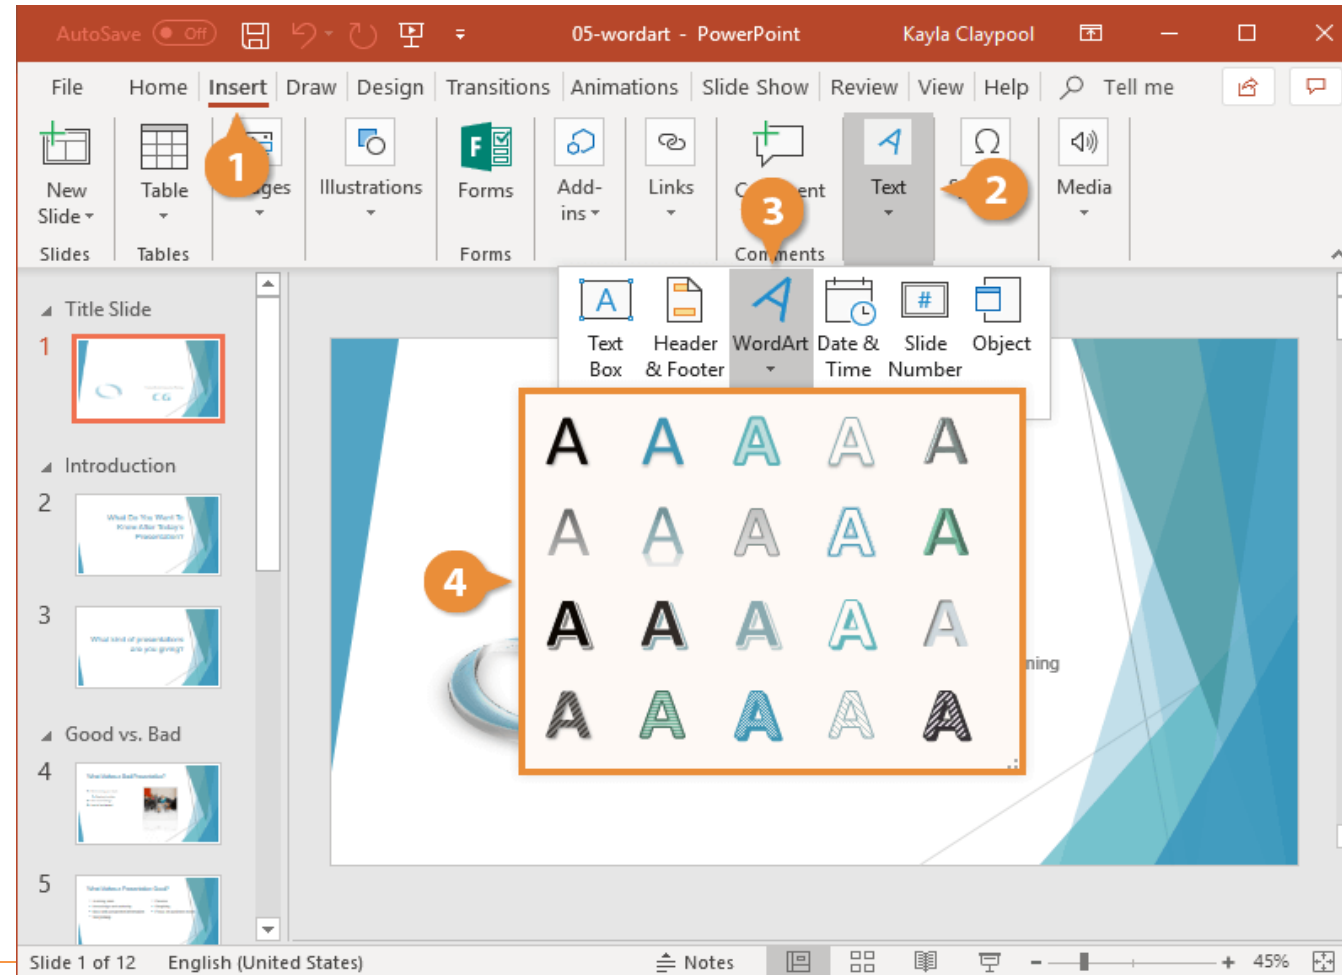

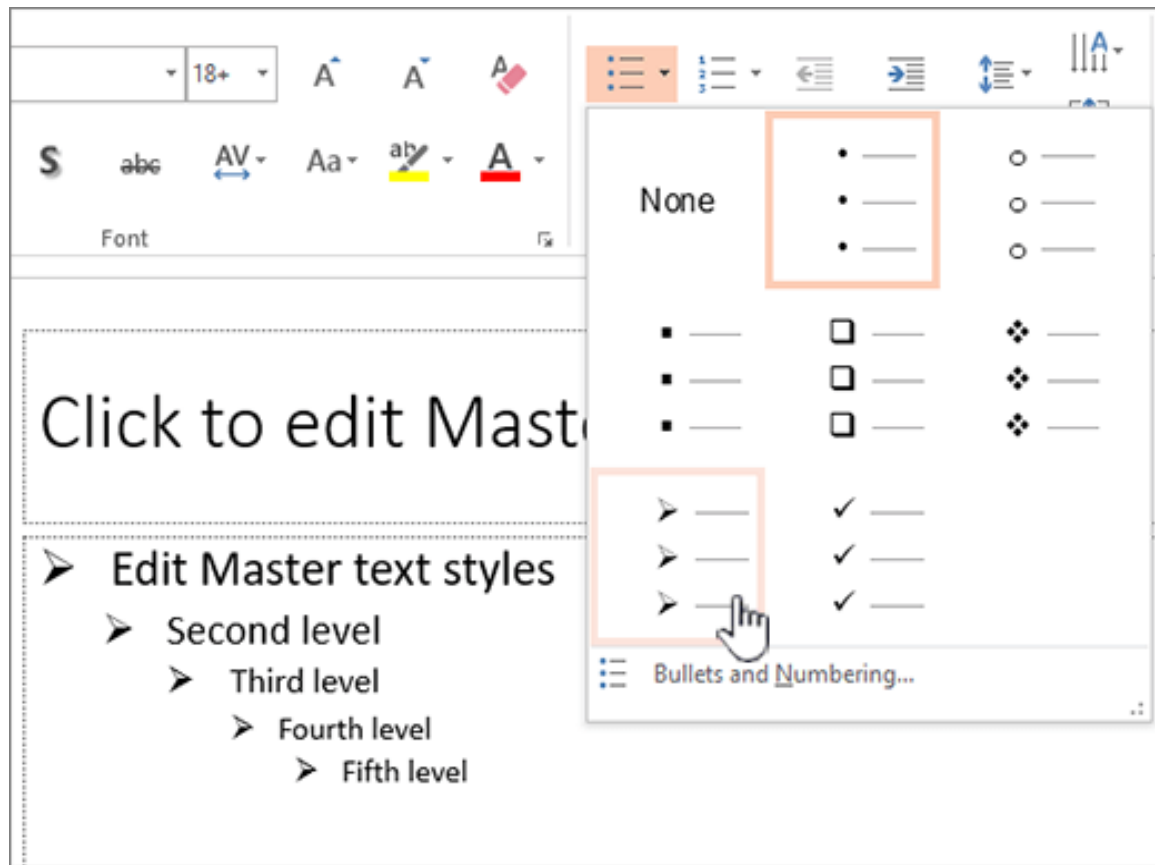

Change the spacing between characters

- Select the text that you want to change.
- On the Home tab, click the Font Dialog Box Launcher, and then click the Advanced tab. ...
- In the Spacing box, click Expanded or Condensed, and then specify how much space you want in the By box.

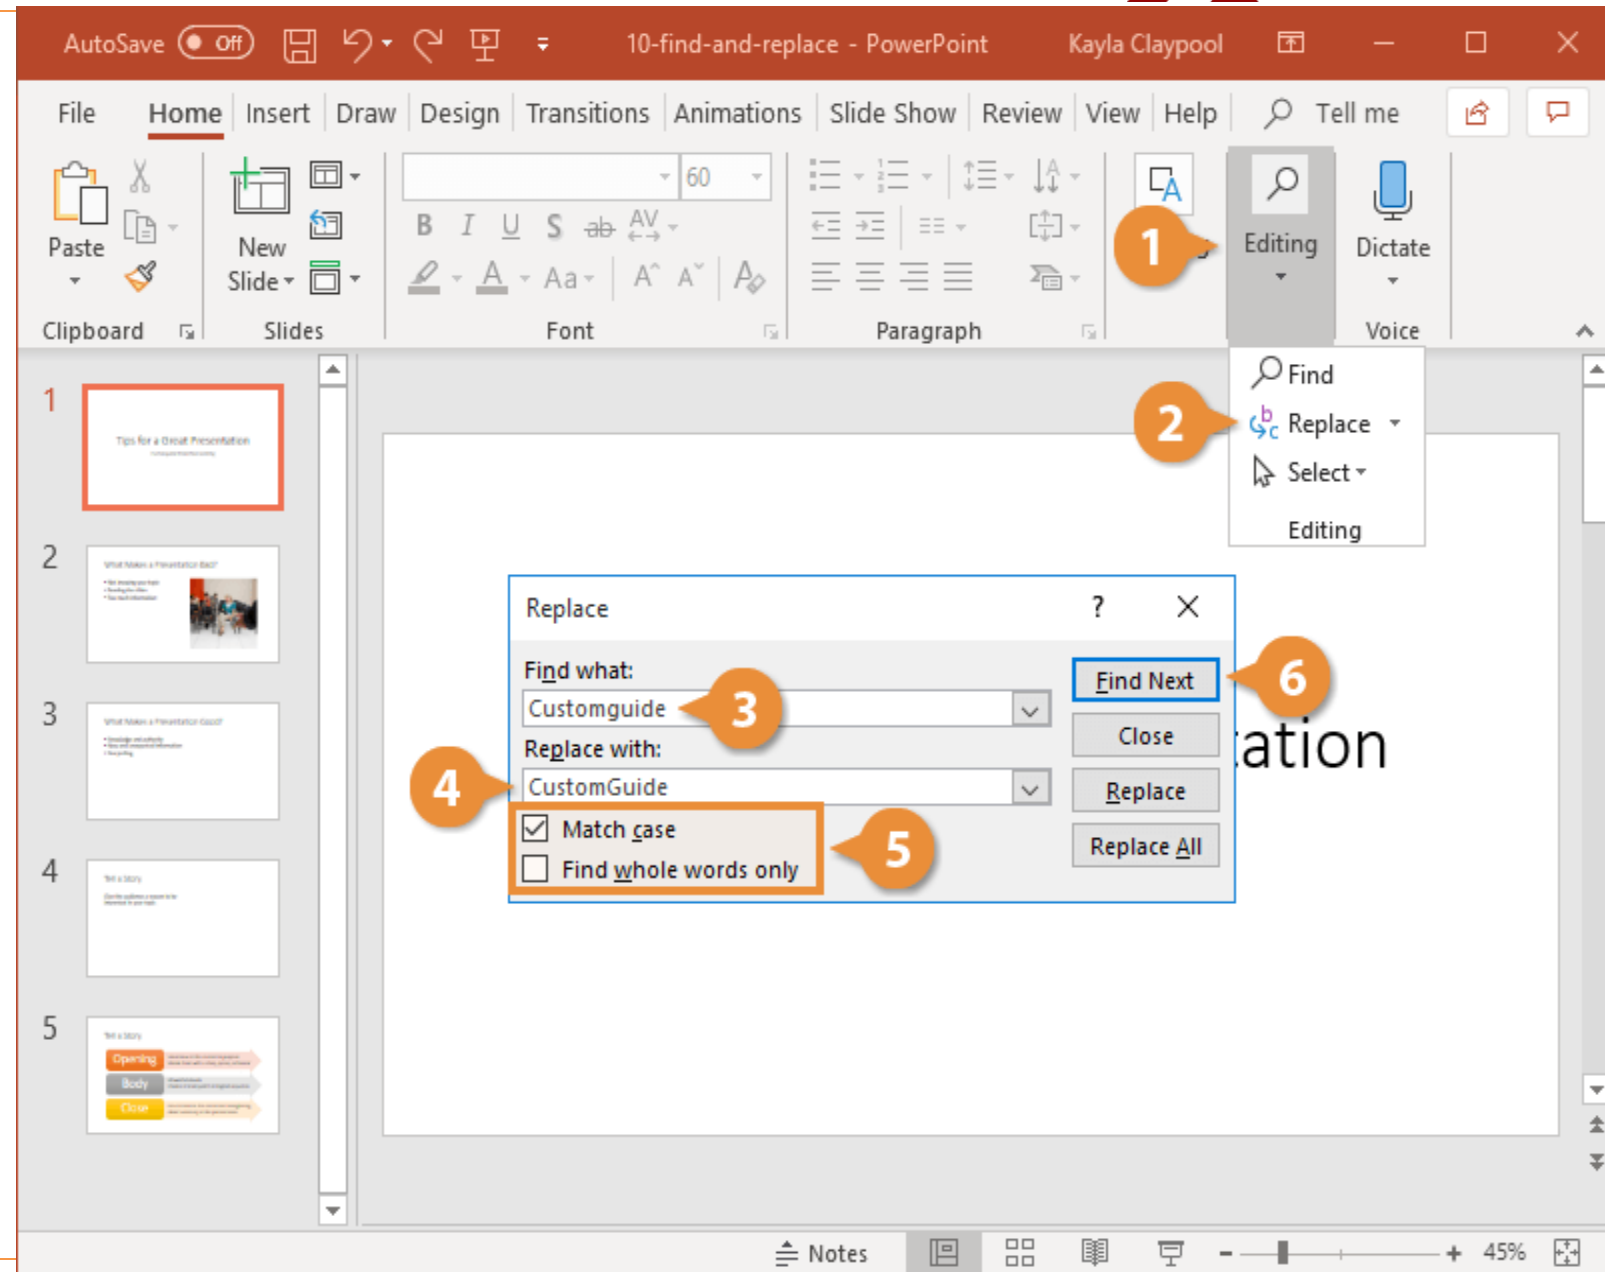

- On the slide, select the lines of text in a text placeholder or table that you want to add bullets or numbering to. On the HOME tab, in the Paragraph group, click Bullets or Numbering. To change all lines of text, select the outline of the text object, and then apply the bullet or numbering.

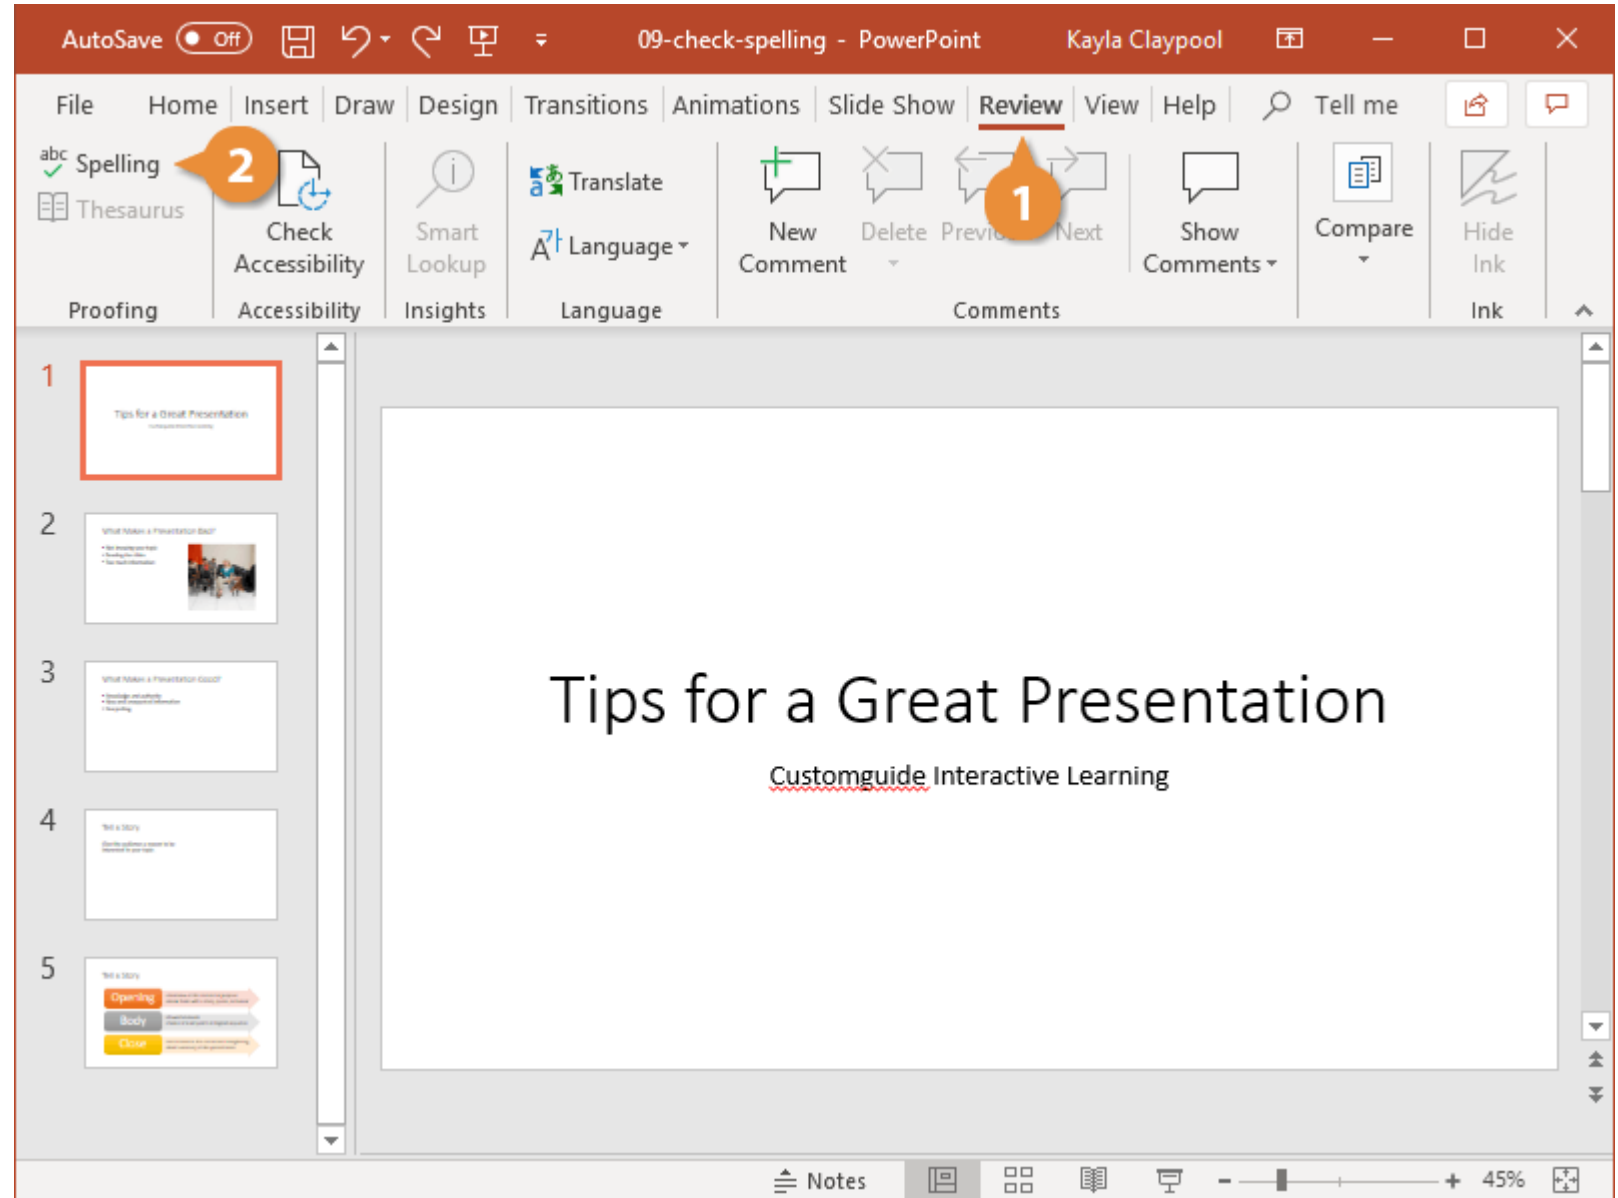

Finding and replacing text,

- In the upper-right corner of the PowerPoint window, click the arrow next to Search in Presentation. Select Replace. In the Find What box, enter the text you want to search for, and in the Replace With box, enter the text you want to use as the replacement. To search for the next occurrence of the text, click Find Next.

Check your entire presentation

- Select Review > Spelling.
- In the Spelling pane, select the correct spelling from the suggestions.
- Select Change to fix the error or Change All if it appears more than once in the document. Or you can select: Ignore: Ignores the error and removes the red squiggly line.

Creating a new and editing a table's structure

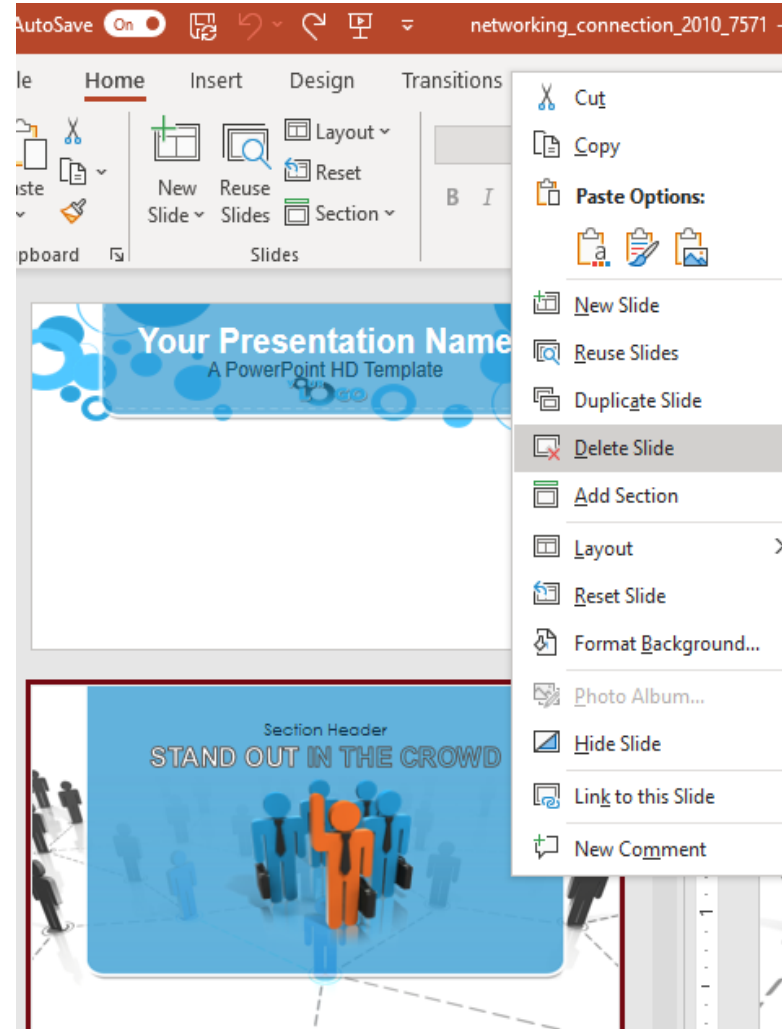

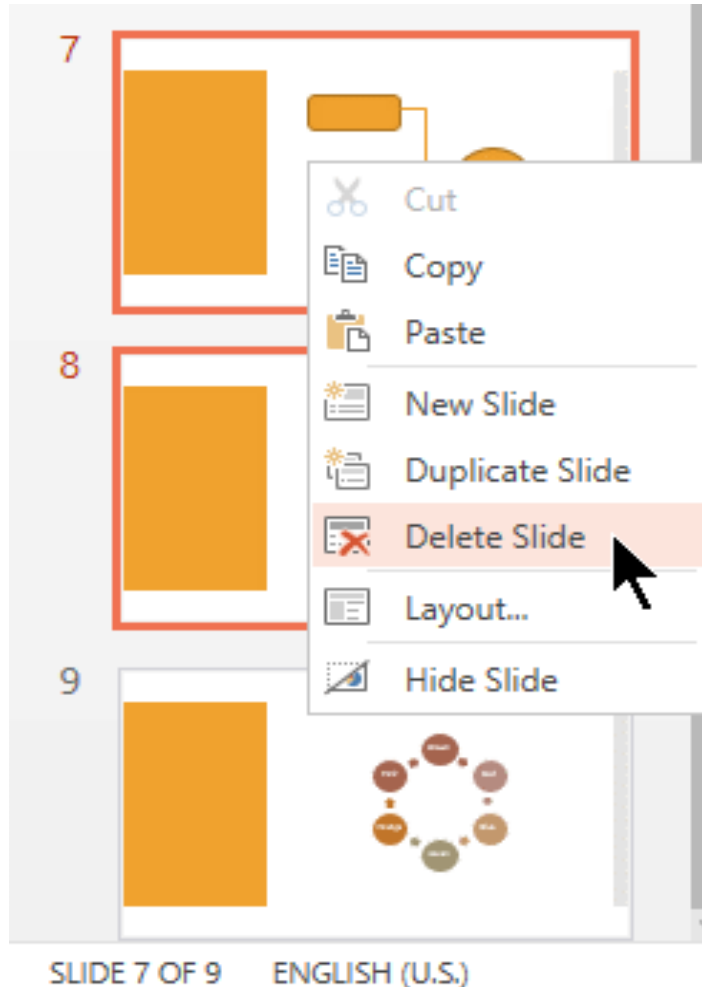

- 1) Here is how to modify various parts of a PowerPoint table. Open a slide with a table, click on the table and the Layout tab appears. After selecting the Layout tab there are options available to modify rows, columns, merge cells, change cell size, modify the alignment, the table size and arrange the table position.

The screenshot shows the Microsoft PowerPoint interface with the 'Layout' tab selected for a table. The table is titled 'Southwest Sales Table' and contains the following data:

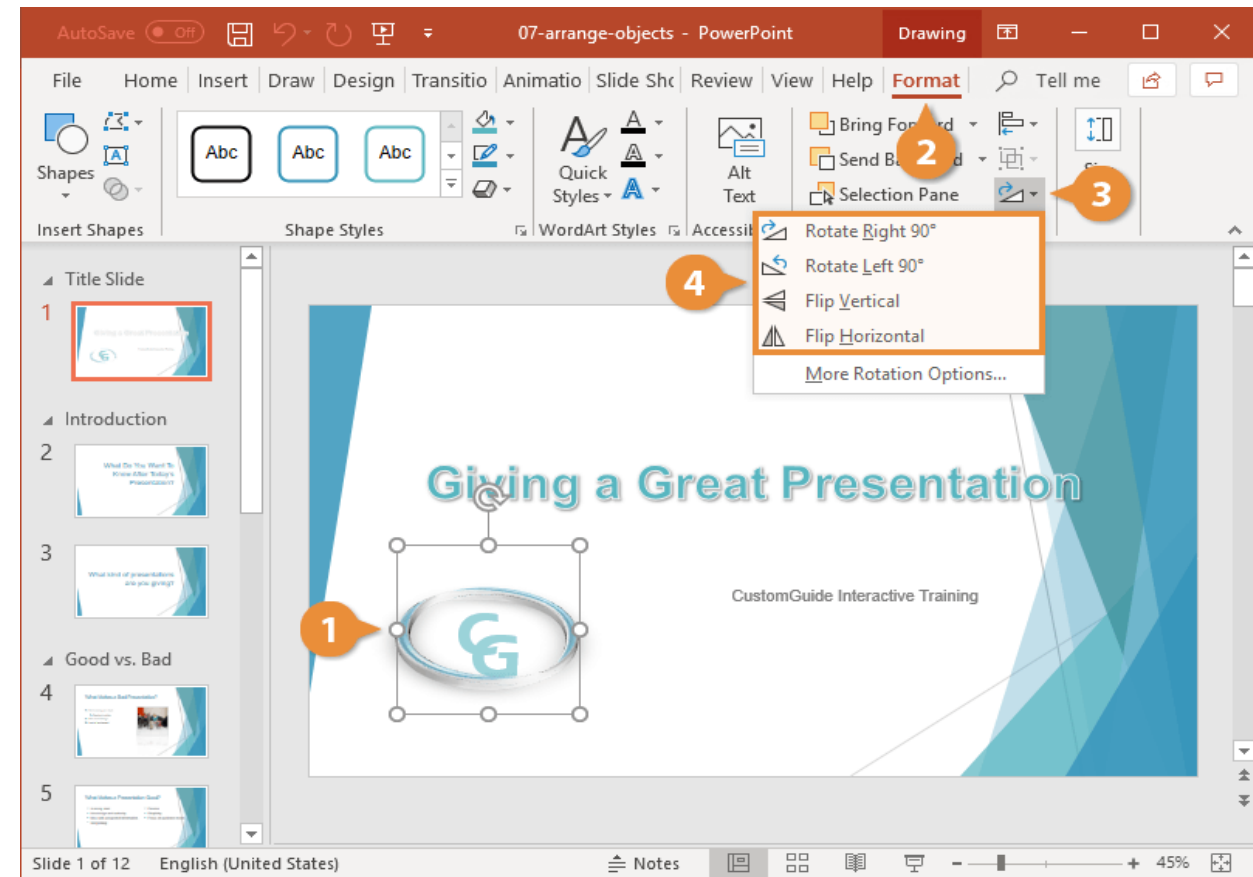

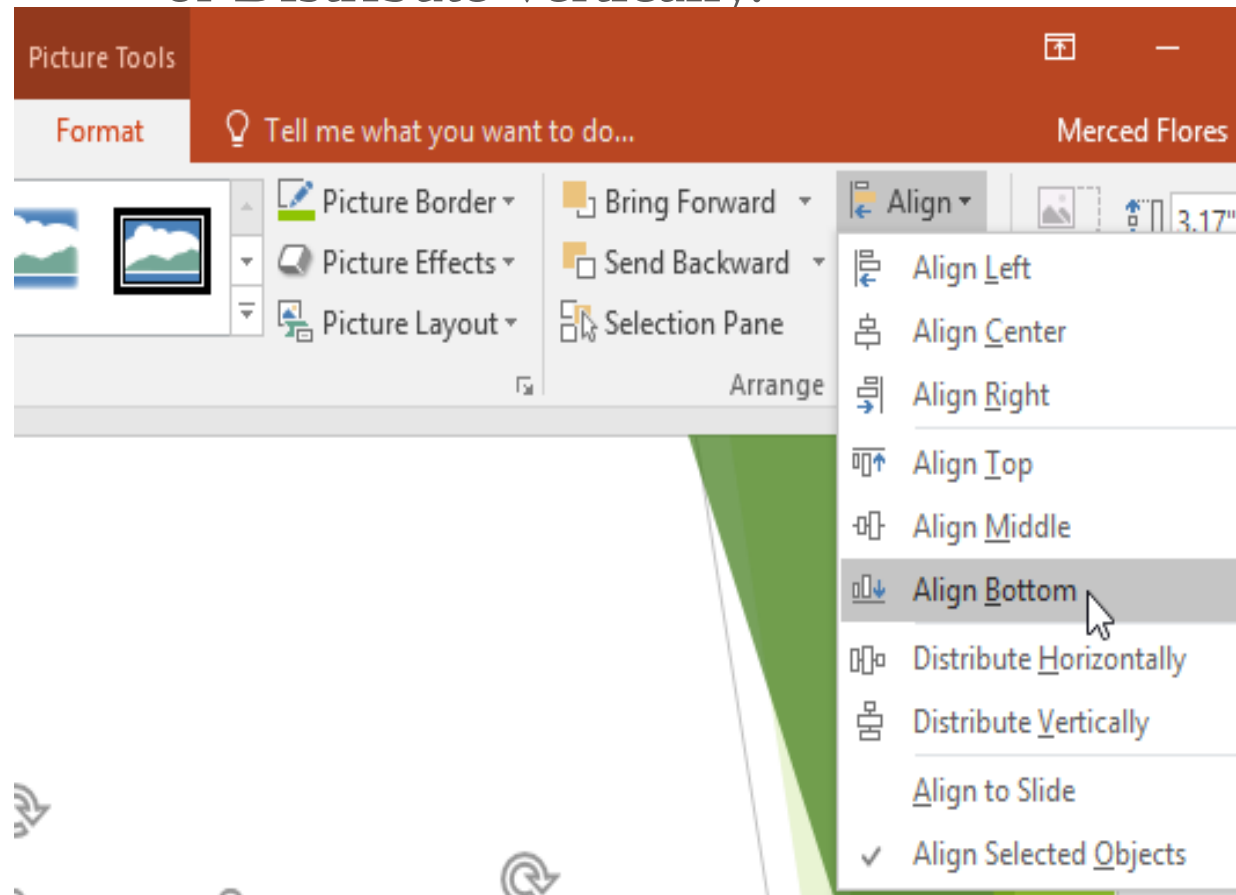

States	July	August	September	Totals
Arizona				
Colorado				
New Mexico				
Utah				

The 'Layout' tab is active, showing options for Rows & Columns, Merge, Cell Size, Alignment, and Table Size. A context menu is open, showing options like Align Left, Align Center, Align Right, Align Top, Align Middle, Align Bottom, Distribute Horizontally, Distribute Vertically, and Align to Slide.

- **Select** the slide to be **moved** by pressing and holding down the left mouse button. Once the slide is **selected**, drag it to the new location. To **copy** a slide:

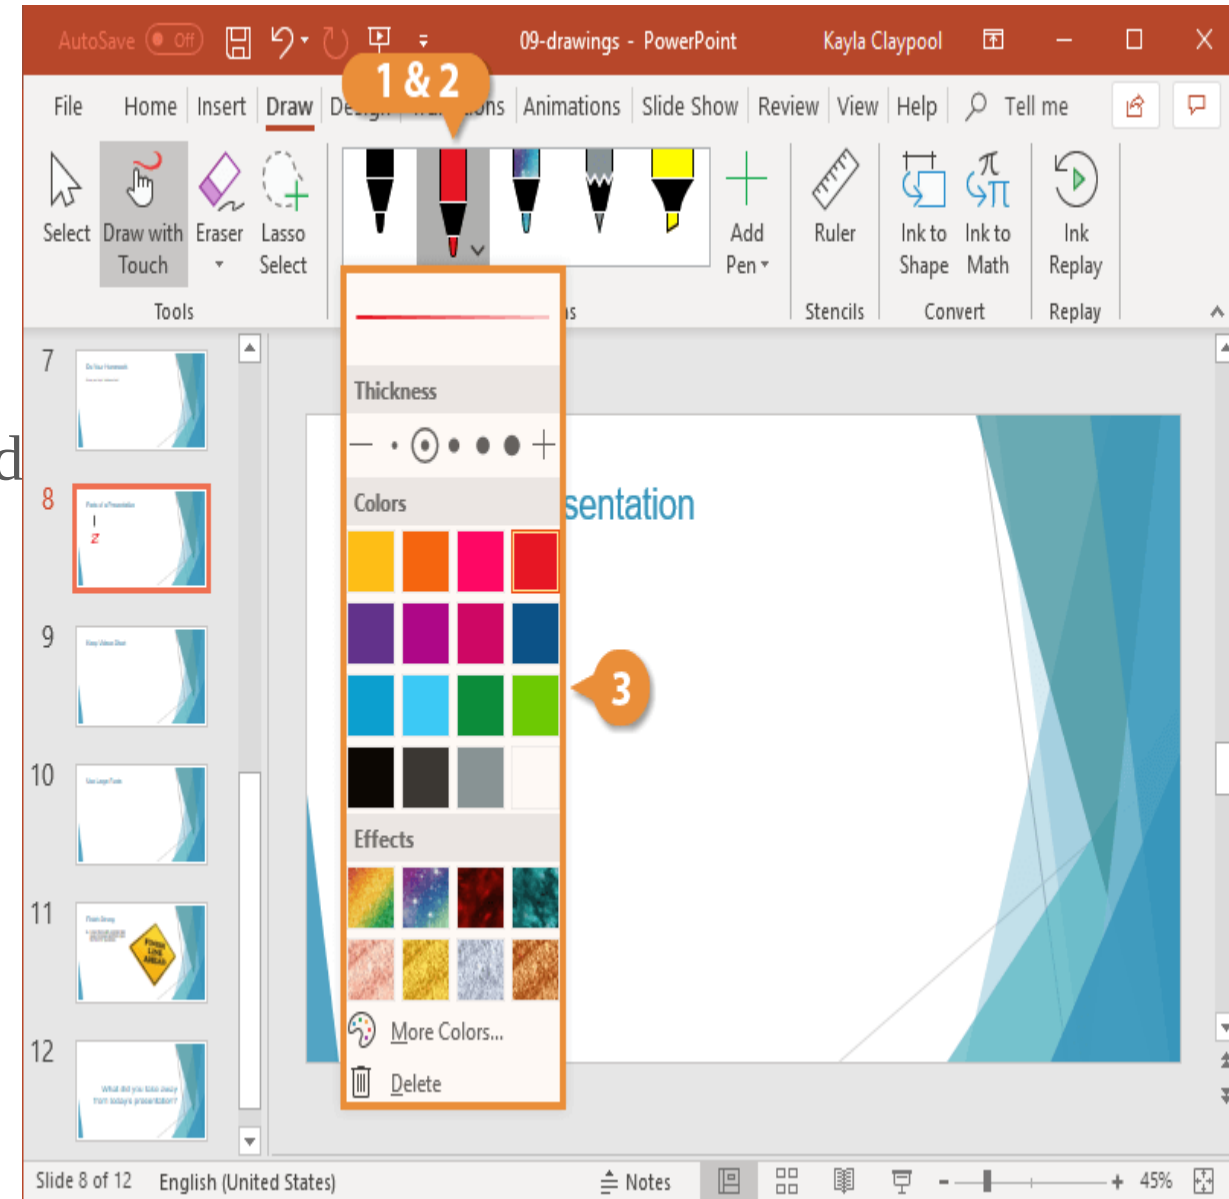

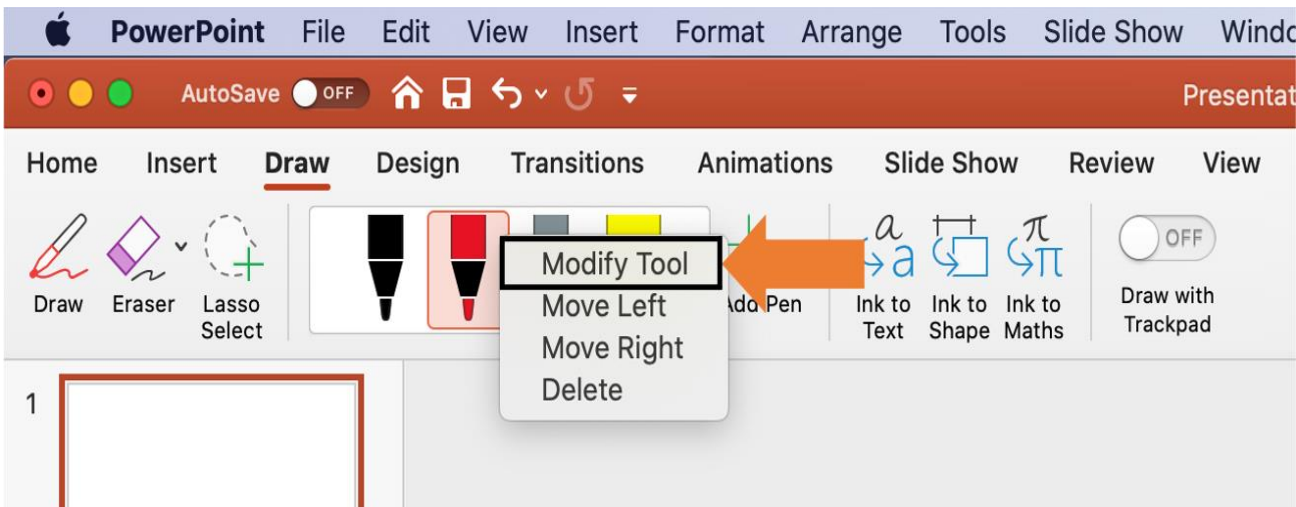

- Select the objects you want to align. Press Shift to select multiple objects.
- Select Picture format > Align and select how you want to align them: Align Left, Align Center, or Align Right. Align Top, Align Middle, or Align Bottom. Distribute Horizontally or Distribute Vertically.

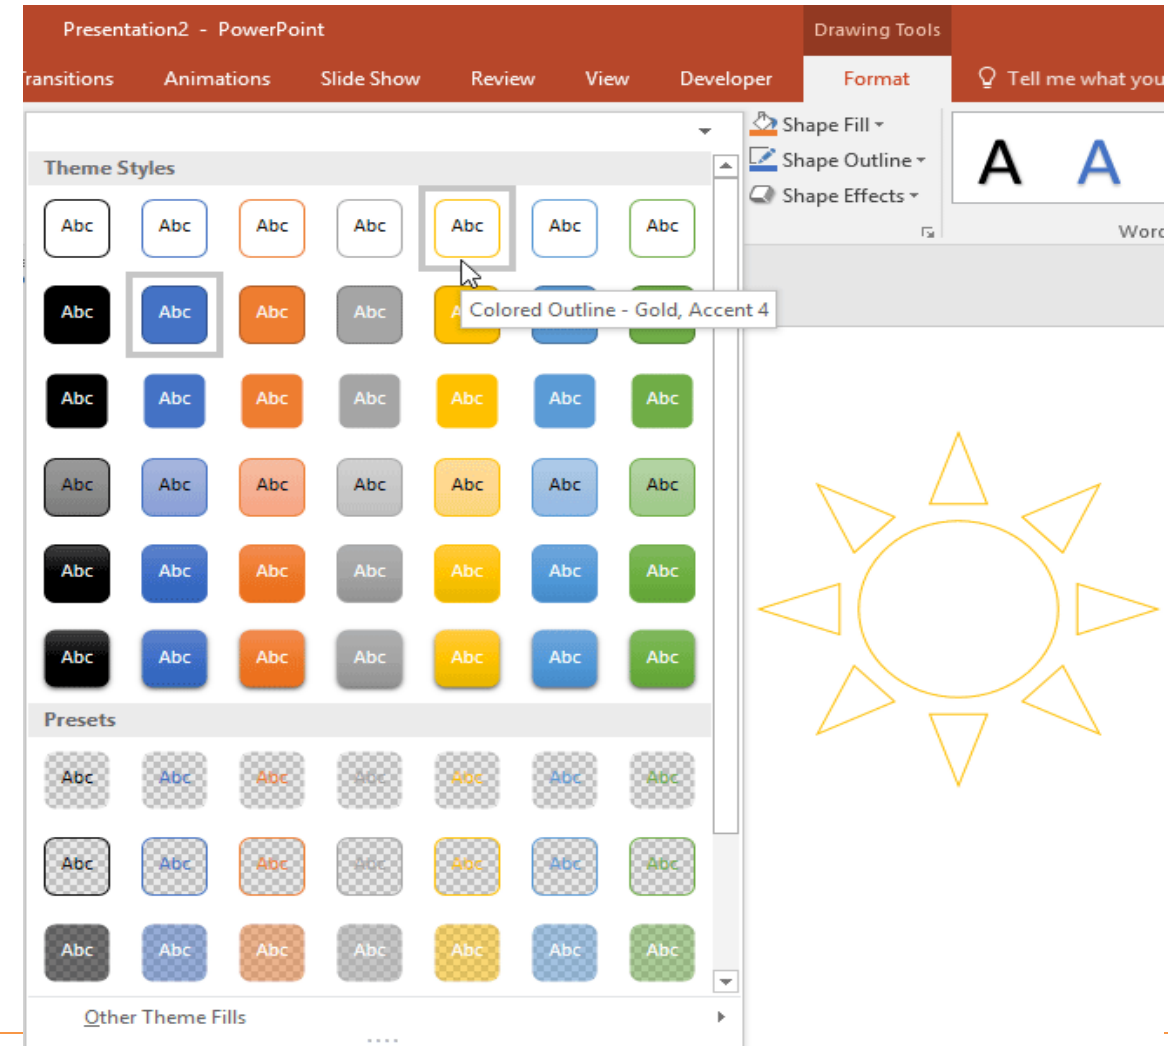

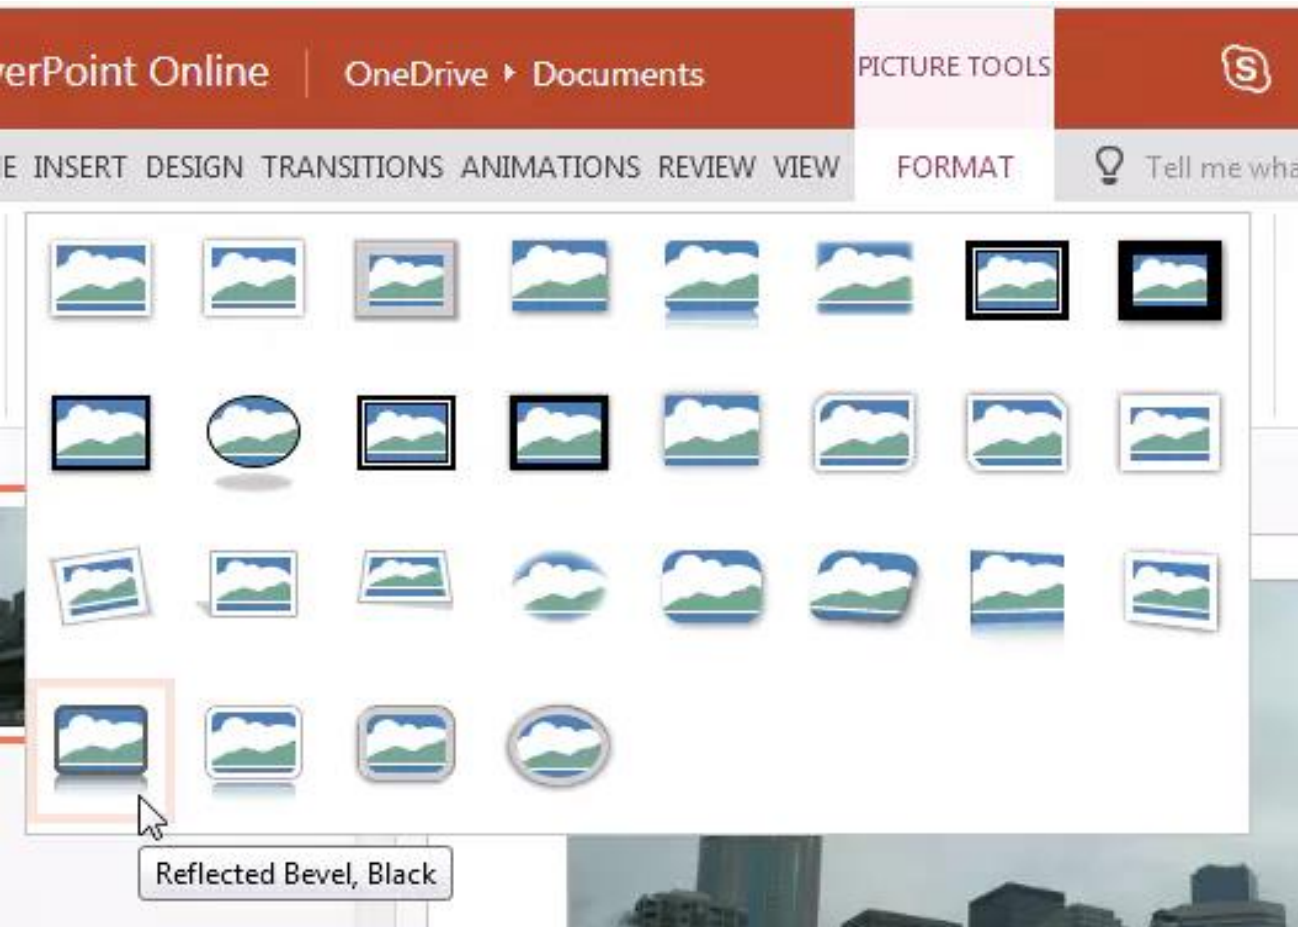

Working with drawing tools

- The Draw tab offers three types of drawing textures: pen, pencil, and highlighter, each with a different look. To choose one, simply click it and you're ready to start drawing. If you want to change its color or thickness, click the drop-down arrow next to the pen and select your preference.

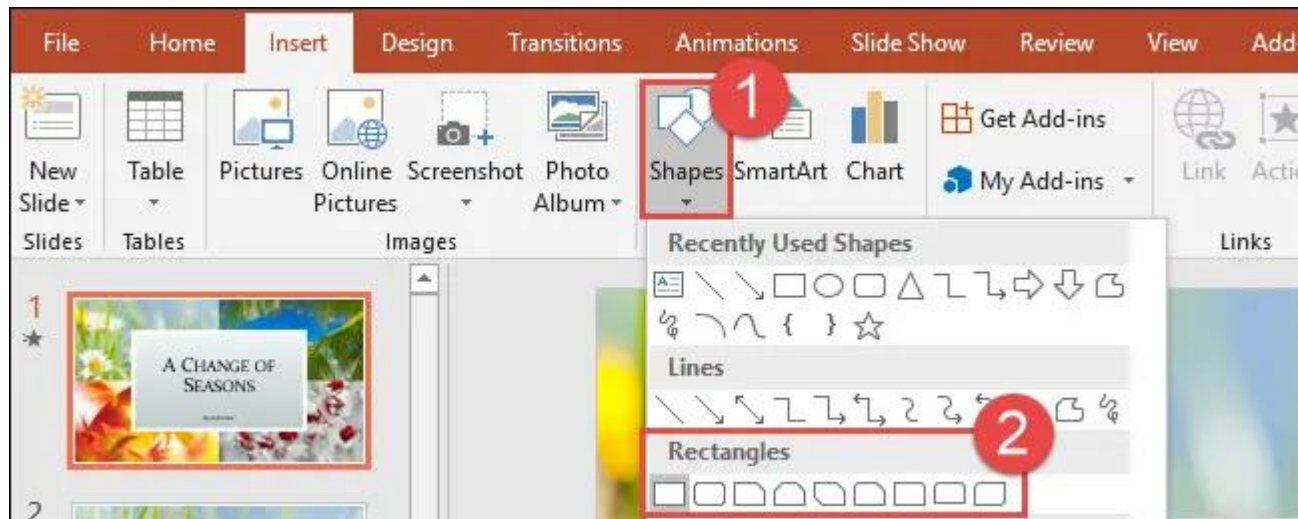

Applying shape or picture styles

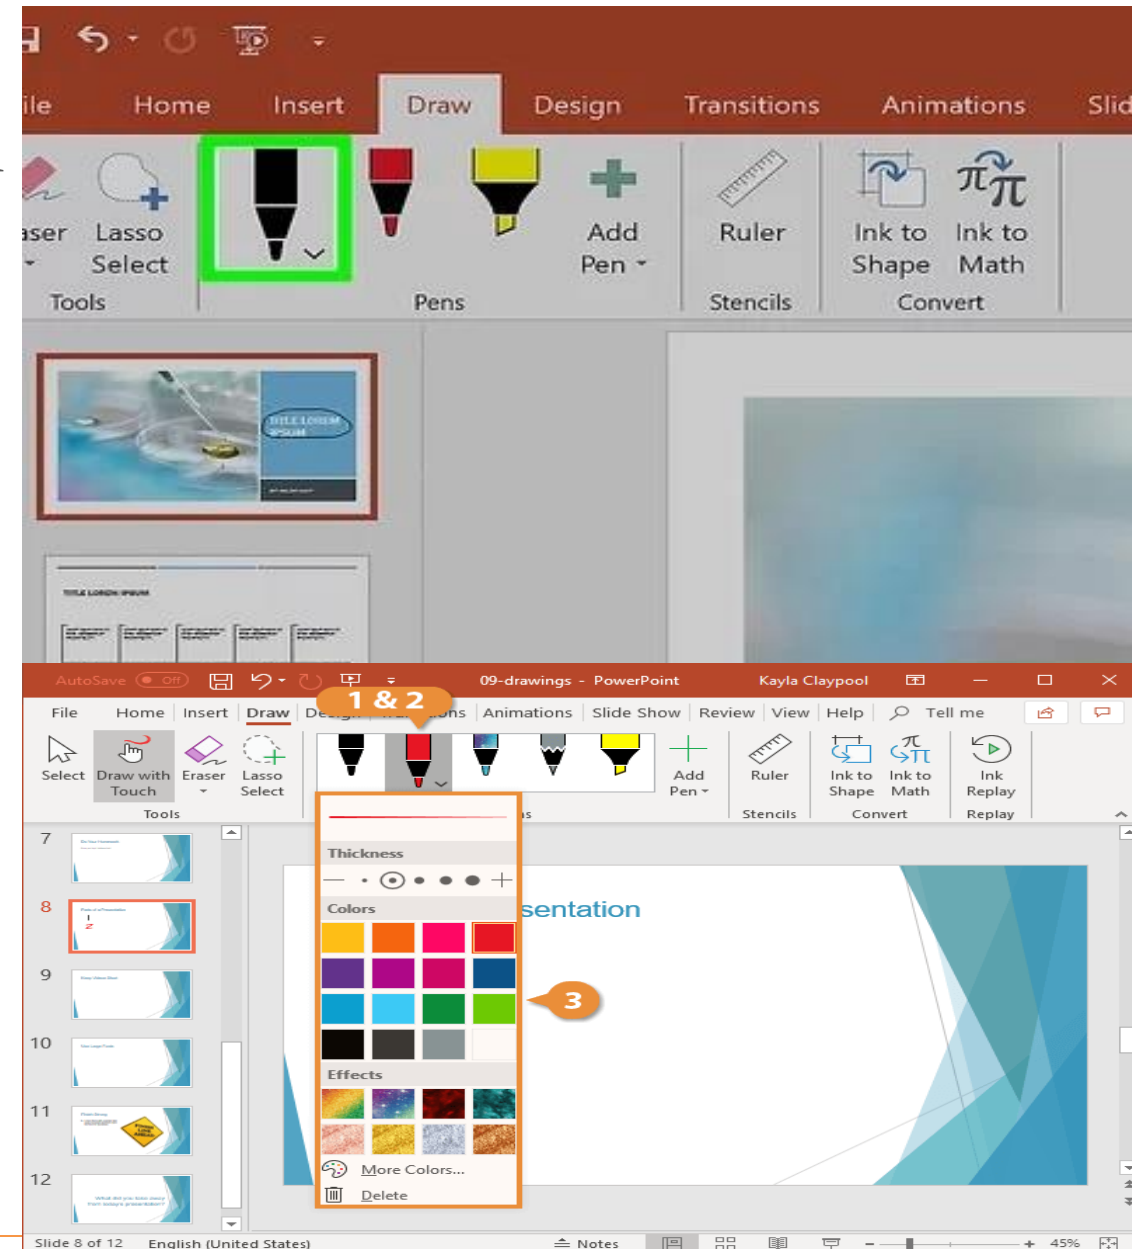

- Apply or change a style
- Click the picture, and then click the Format Picture tab. Under Picture Styles, click the style that you want.

- On the Format tab, select Shape Outline, and choose the color you want for the border. Select Shape Outline again. Use the Weight and Dashes options near the bottom of the menu to select the line thickness and style you want for your border. Drag the handles on the shape to size and position the border on the slide.

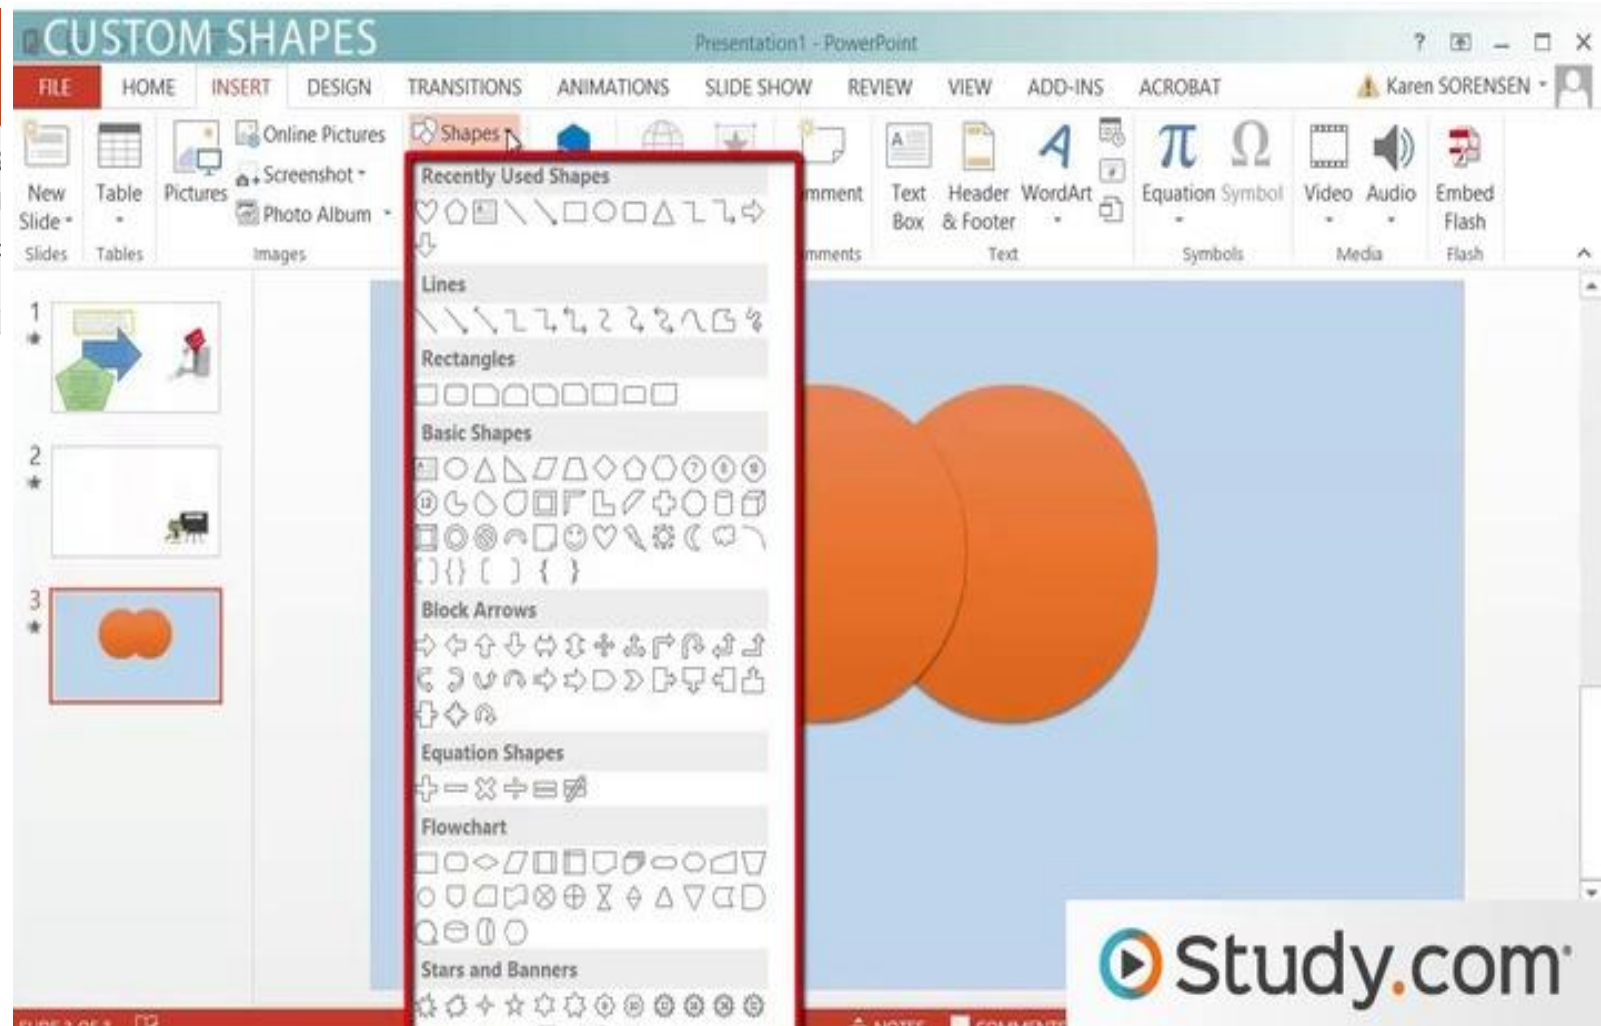

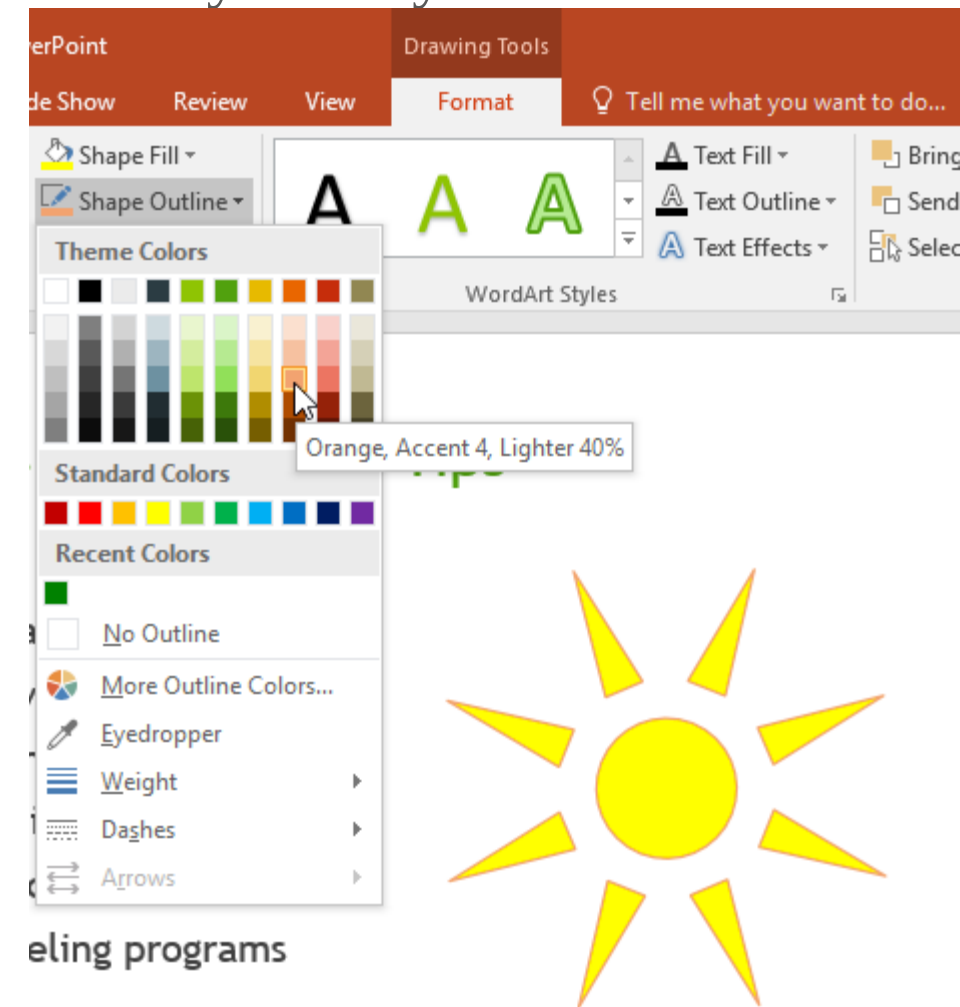

- The Draw tab offers three types of drawing textures: **pen, pencil, and highlighter**, each with a different look. To choose one, simply click it and you're ready to start drawing. If you want to change its color or thickness, click the drop-down arrow next to the pen and select your preference.
- **How to Use Drawing Tools in PowerPoint**
- Click the Draw tab.
- Click the Draw with Touch button. The mouse cursor changes to a drawing tool, and you can draw a shape by clicking and drawing on the page.
- Draw a shape using the mouse or touchscreen.

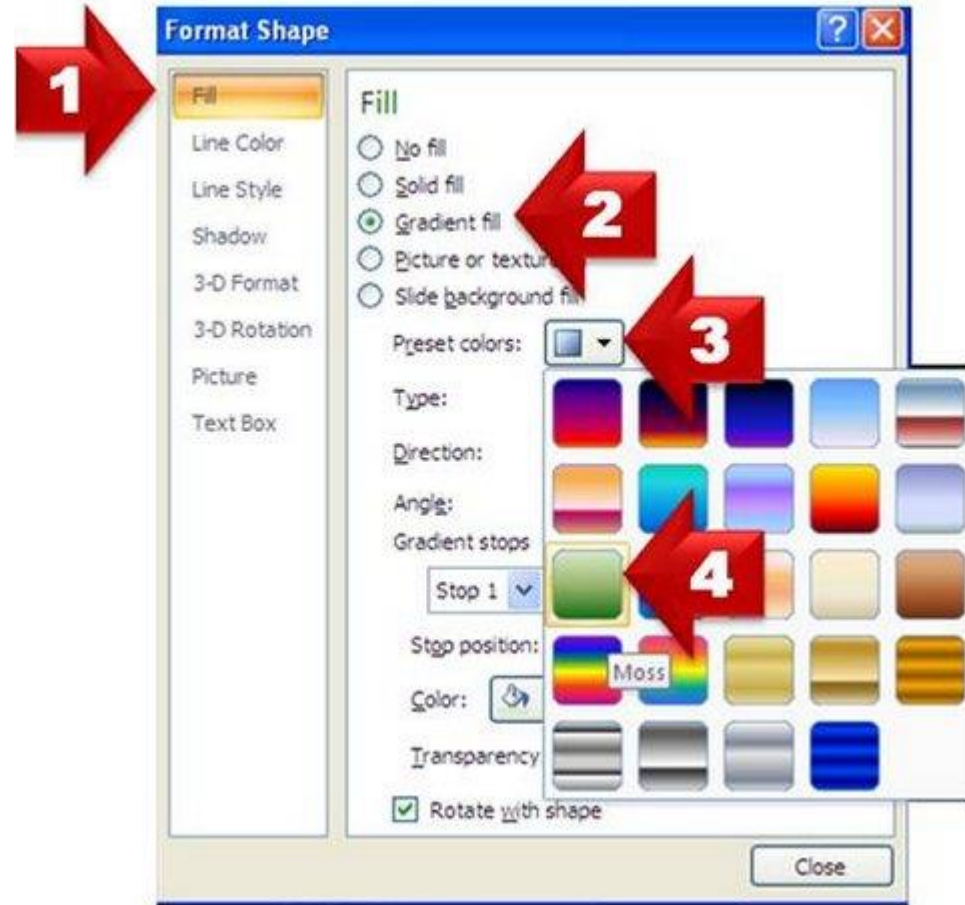

Applying shape or picture styles

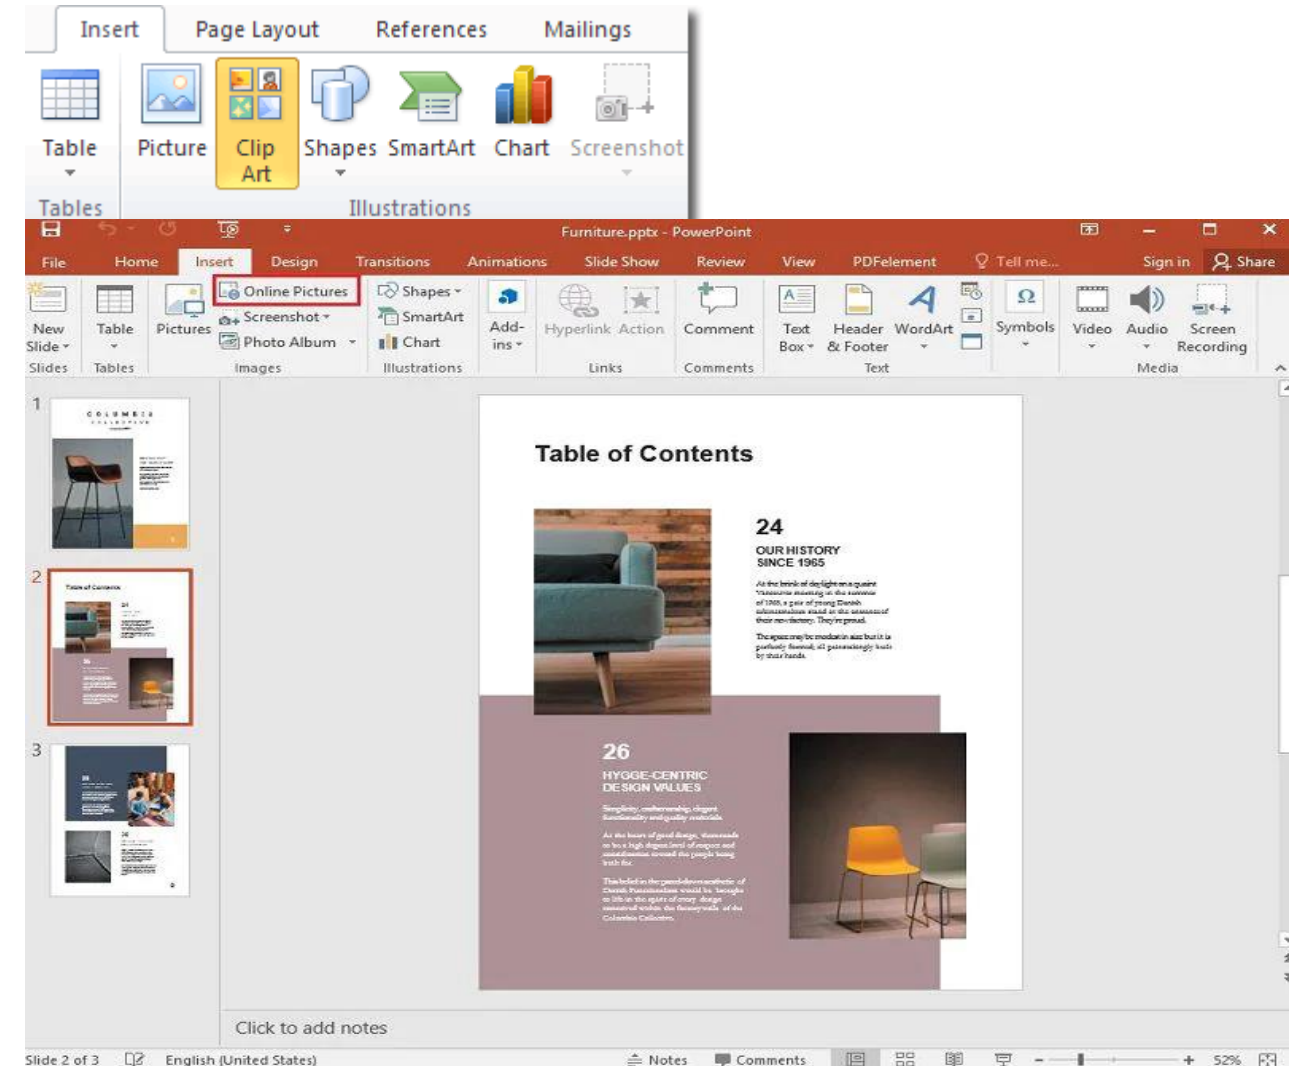

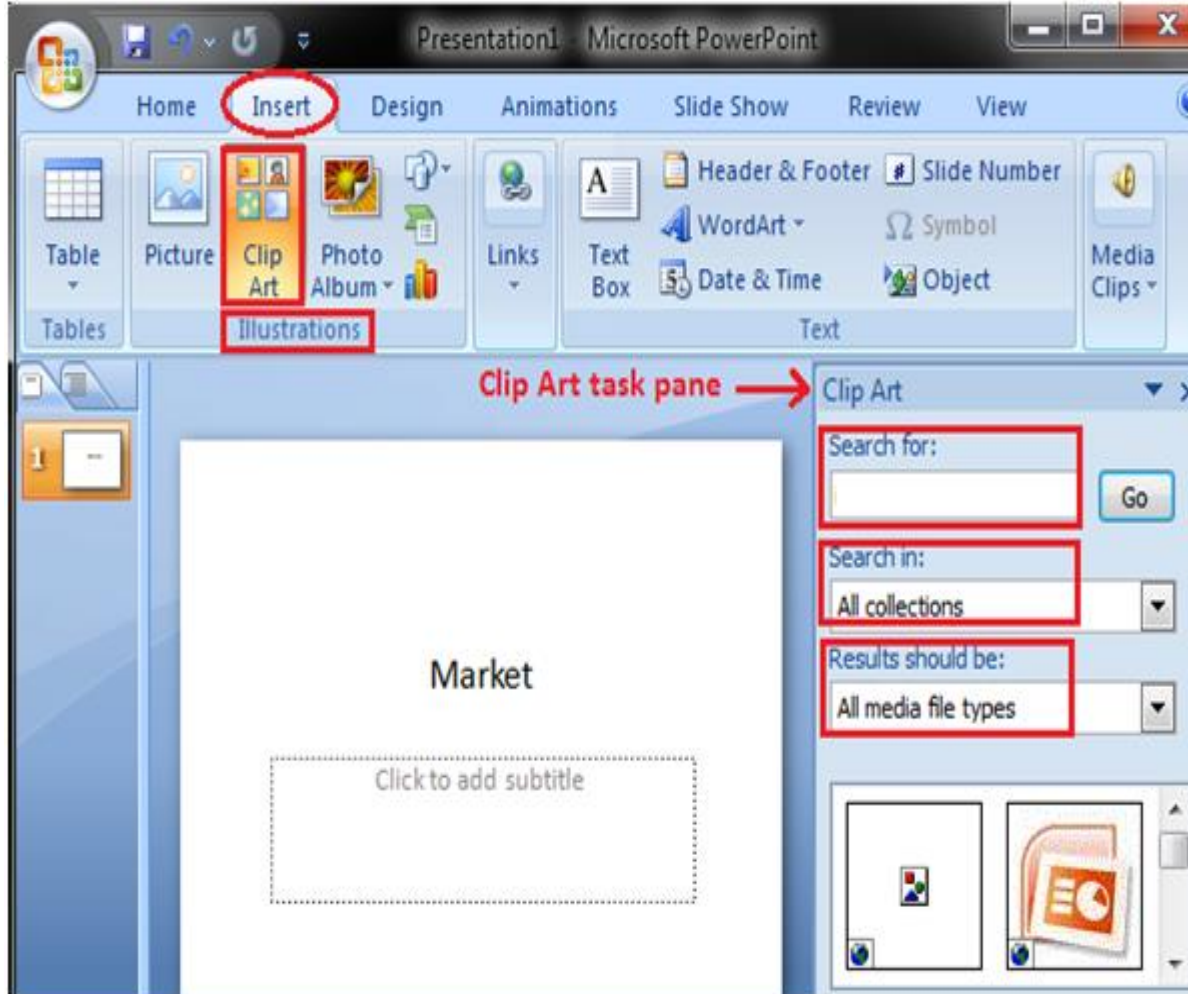

- Click the picture, and then click the Format Picture tab. Under Picture Styles, click the style that you want.

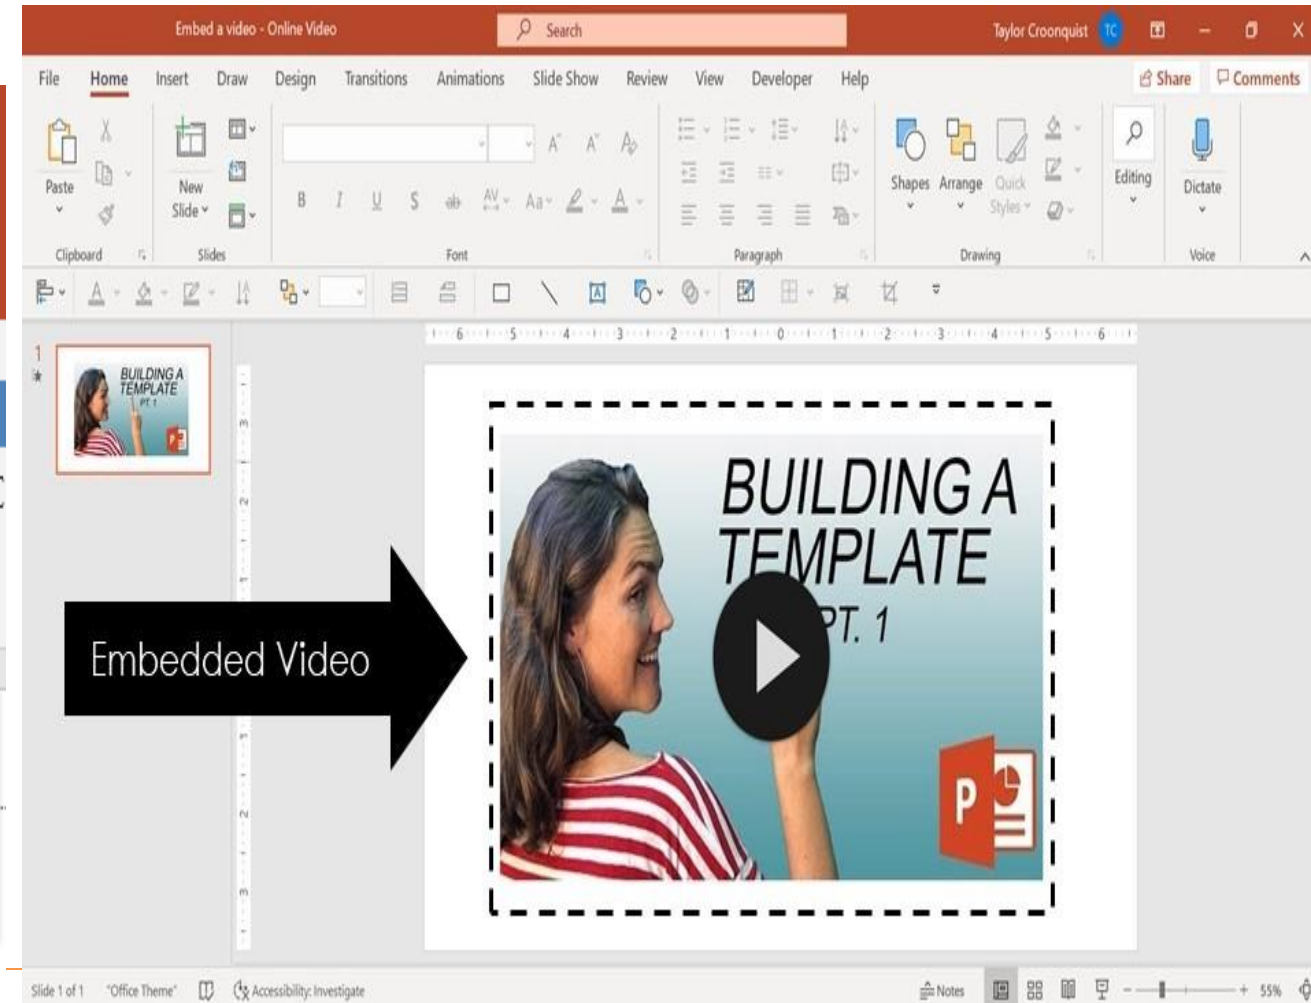

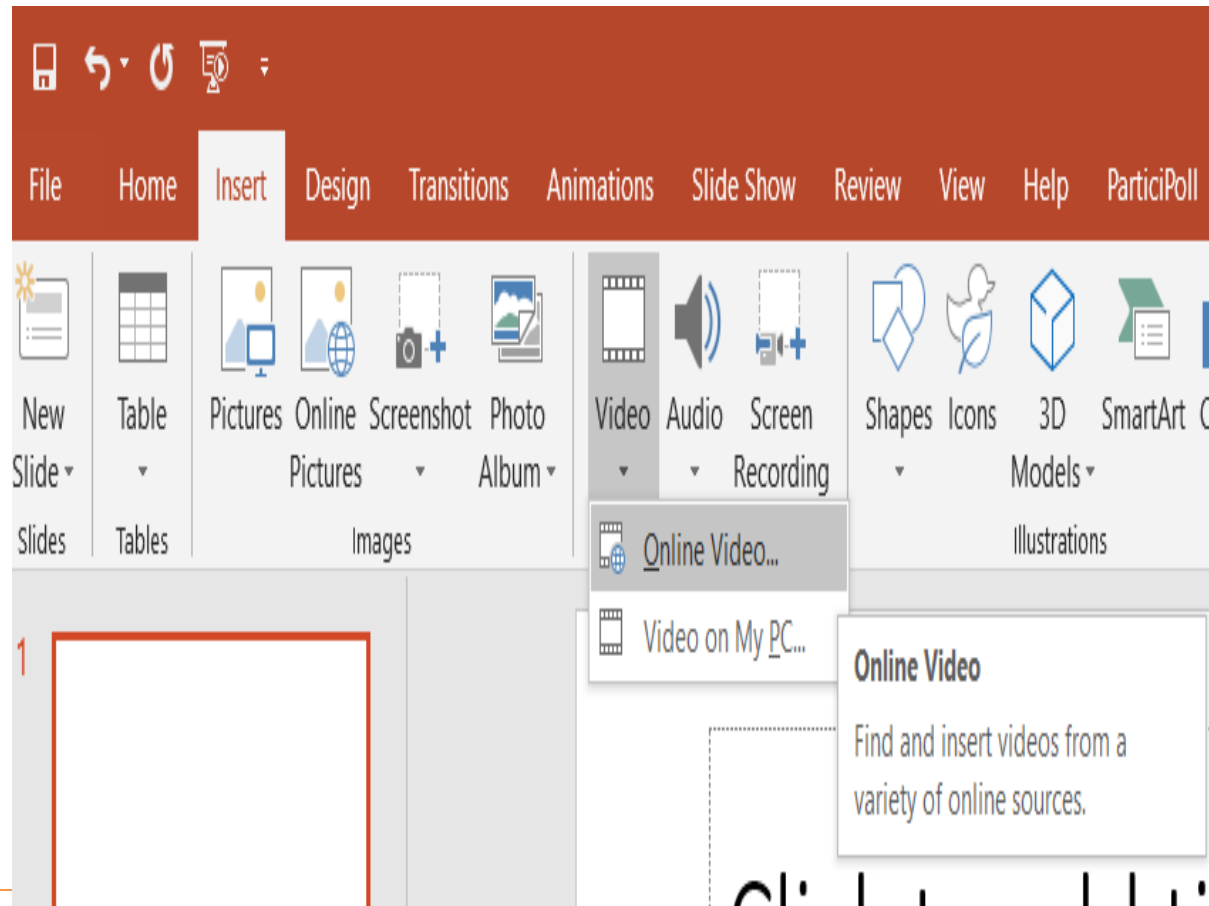

- To add a fill or effect, click your shape, click Format, click the arrow next to Shape Fill or Shape Effects, and select a color, gradient, texture, or effect. Click the shape that you want to fill.

- Click in the slide where you want to insert a **clip art** file. On the Insert tab, in the Images group, click Online Pictures

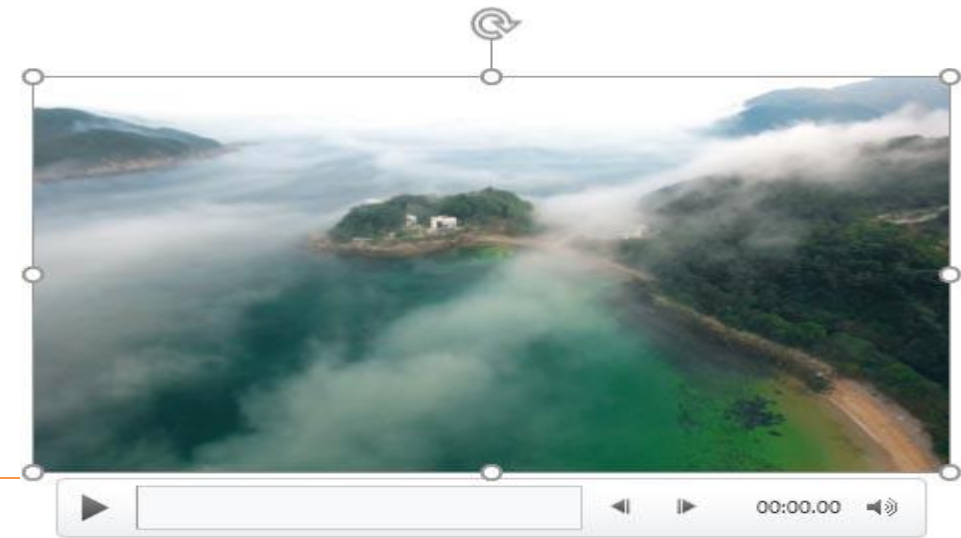

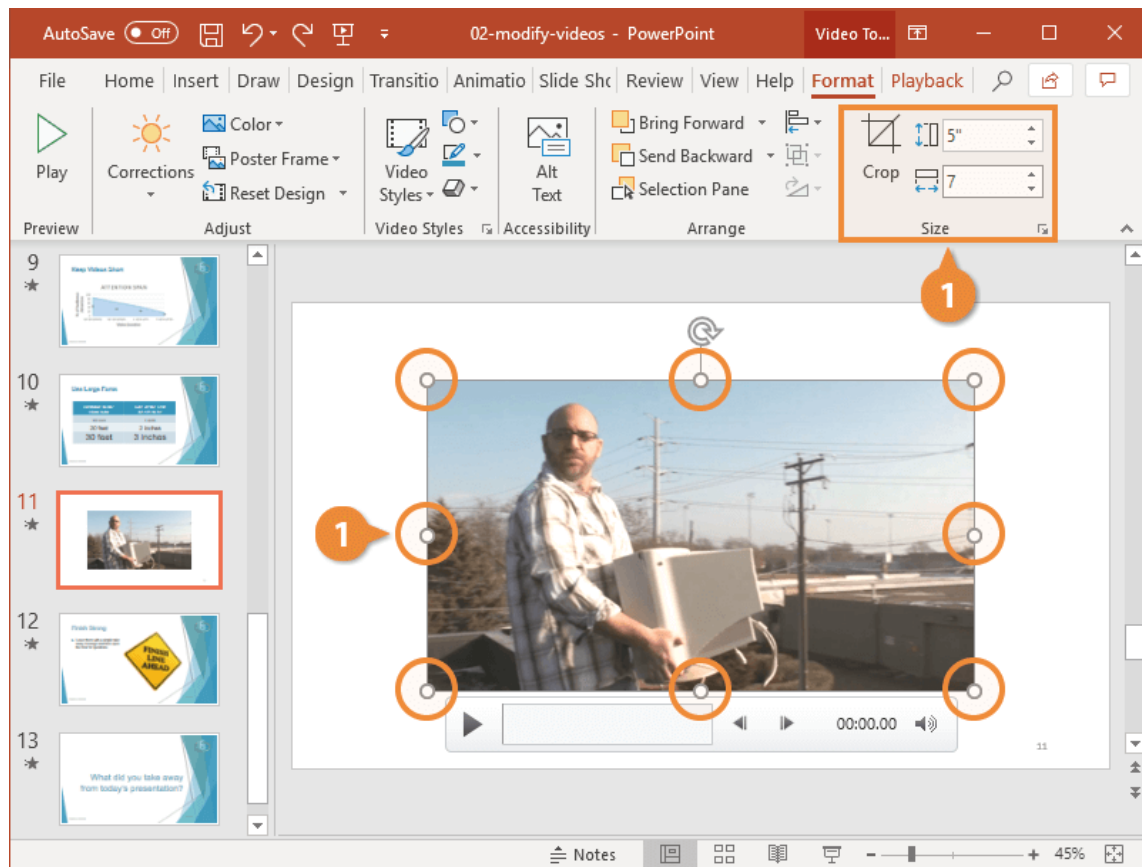

- In PowerPoint, click the slide that you want to add a video to. On the Insert tab, click Video > Online Video. In the From a Video Embed Code box, paste the embed code, and then click the arrow. A video rectangle is placed on your slide, which you can move and resize as you like.

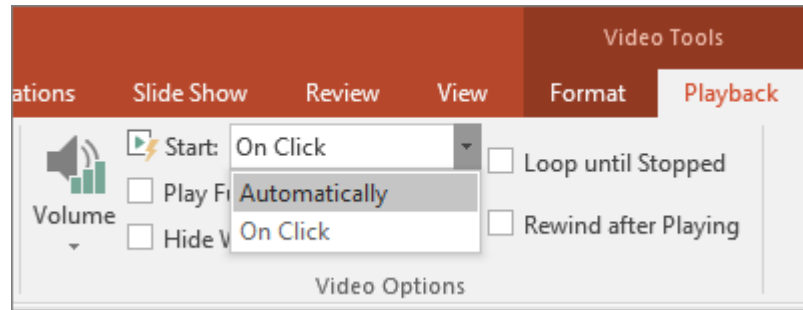

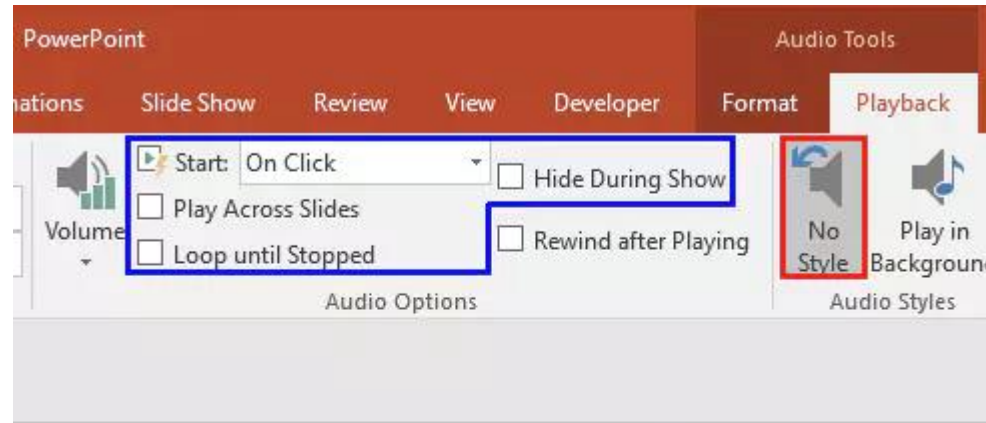

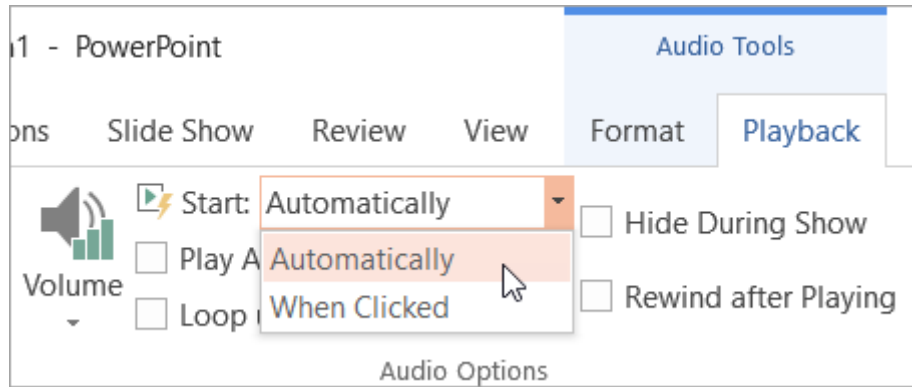

Resize a video

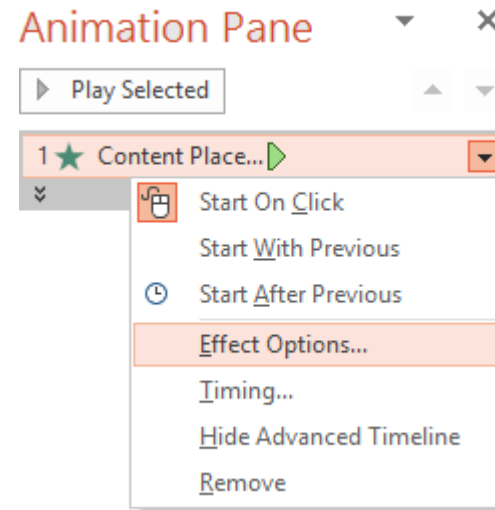

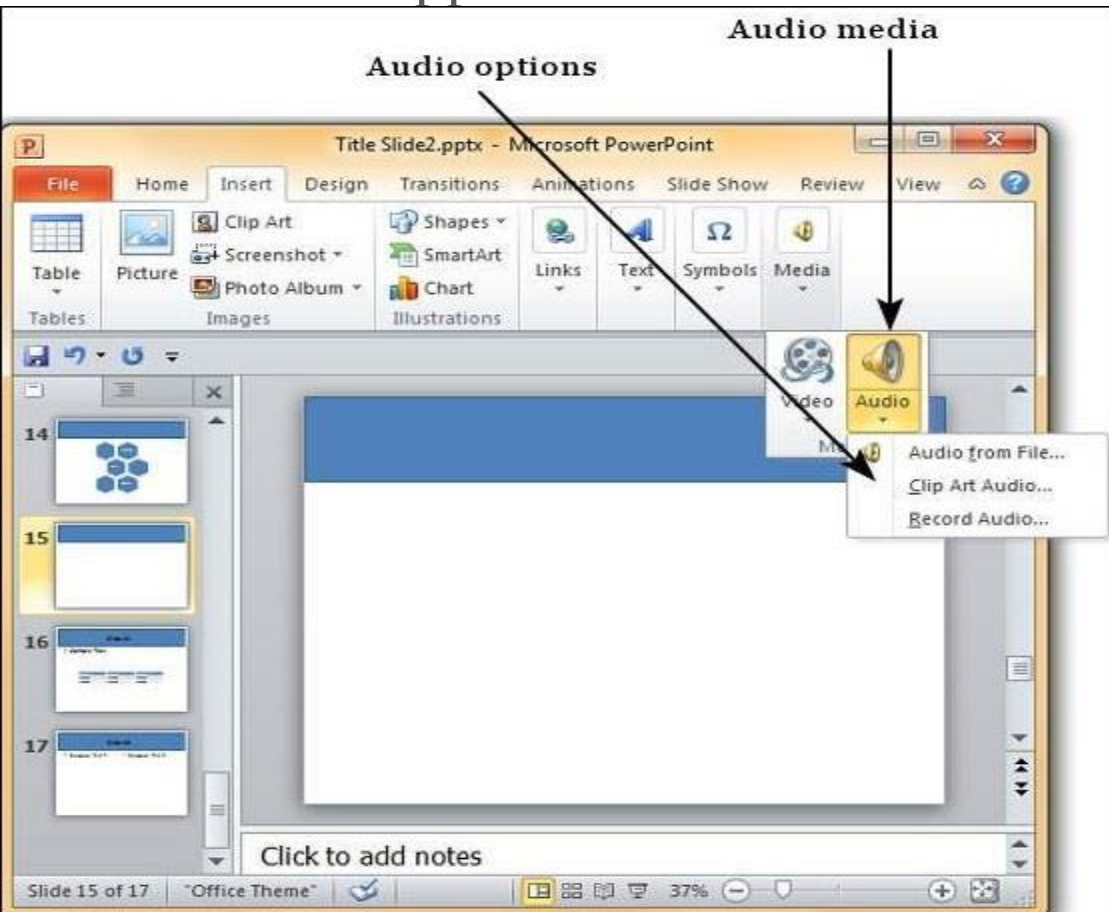

- Under Video Tools, on the Format tab (PowerPoint 2013 or newer versions) or Options tab (PowerPoint 2010), in the Size group, click the Dialog Box Launcher.
- Click Size, and then under Scale, select the Lock aspect ratio check box.

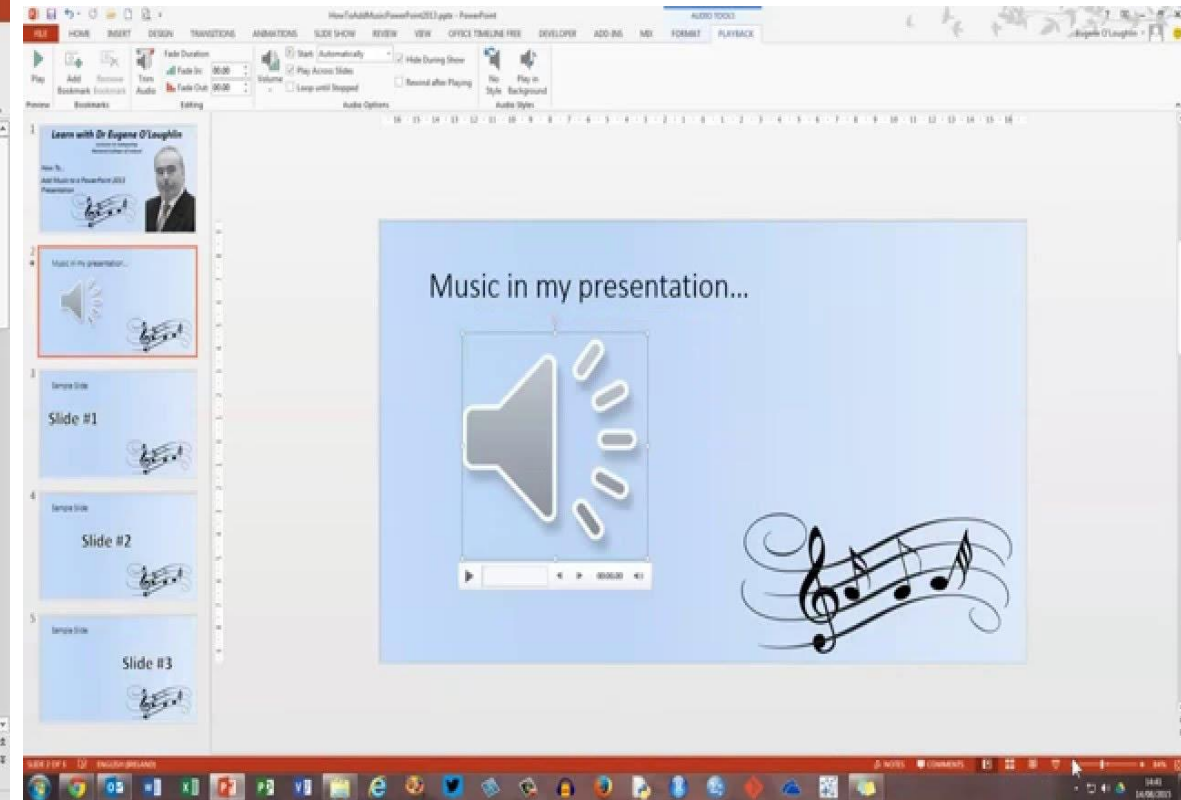

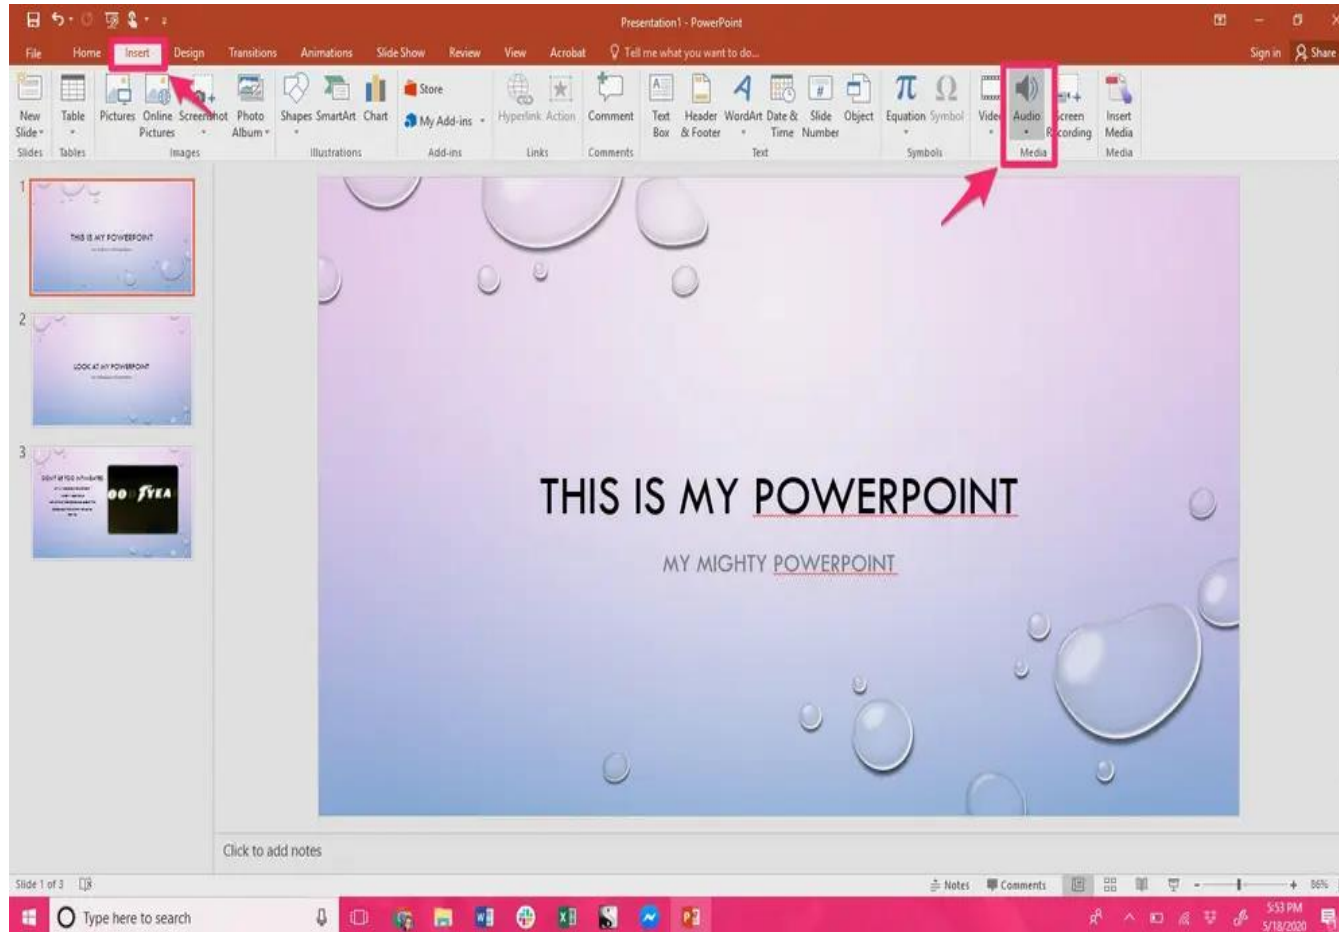

- Select the audio icon and then select the Audio tab or Playback tab. Then select which options you'd like to use: To adjust volume, select Volume and select the setting you prefer.

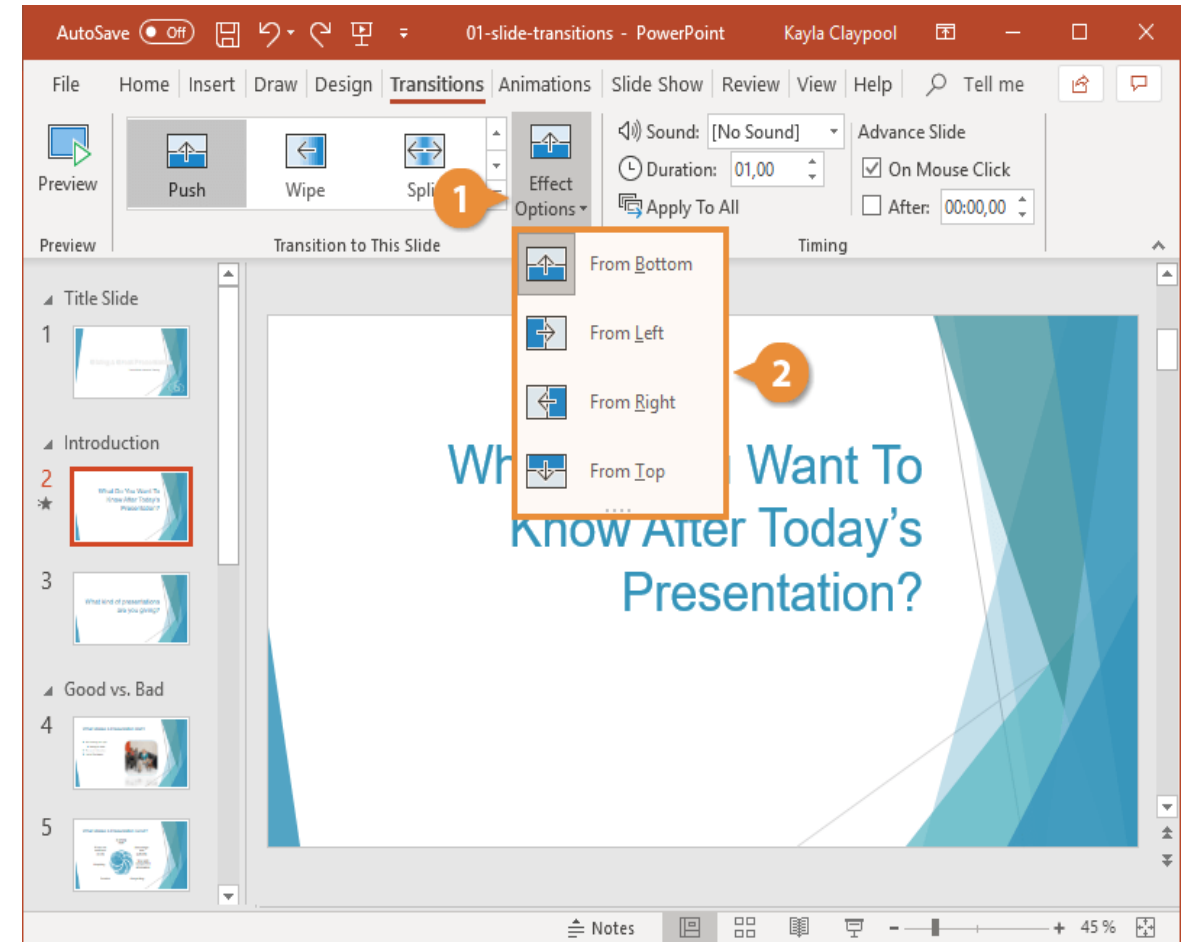

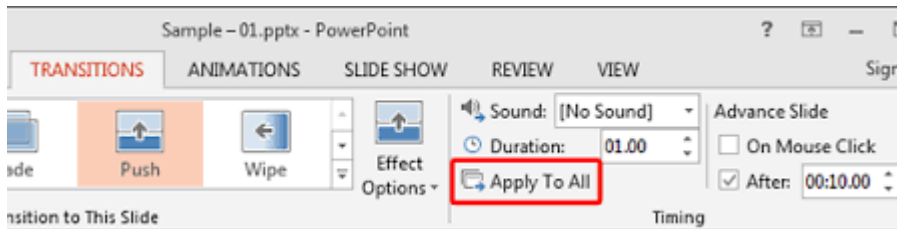

- In Normal view, click the slide that you want to add a sound to. On the Insert tab, in the Media group, click the arrow under Audio. In the list, click Audio from file or Clip Art audio, locate and select the audio clip that you want, and then click Insert. The audio and controls appear on the slide.

- On the Insert tab, select Audio, and then Audio from File. In the file explorer, locate the music file you want to use and then select Insert. With the audio icon selected on the slide, on the Playback tab, click the list named Start, and select Play across slides.

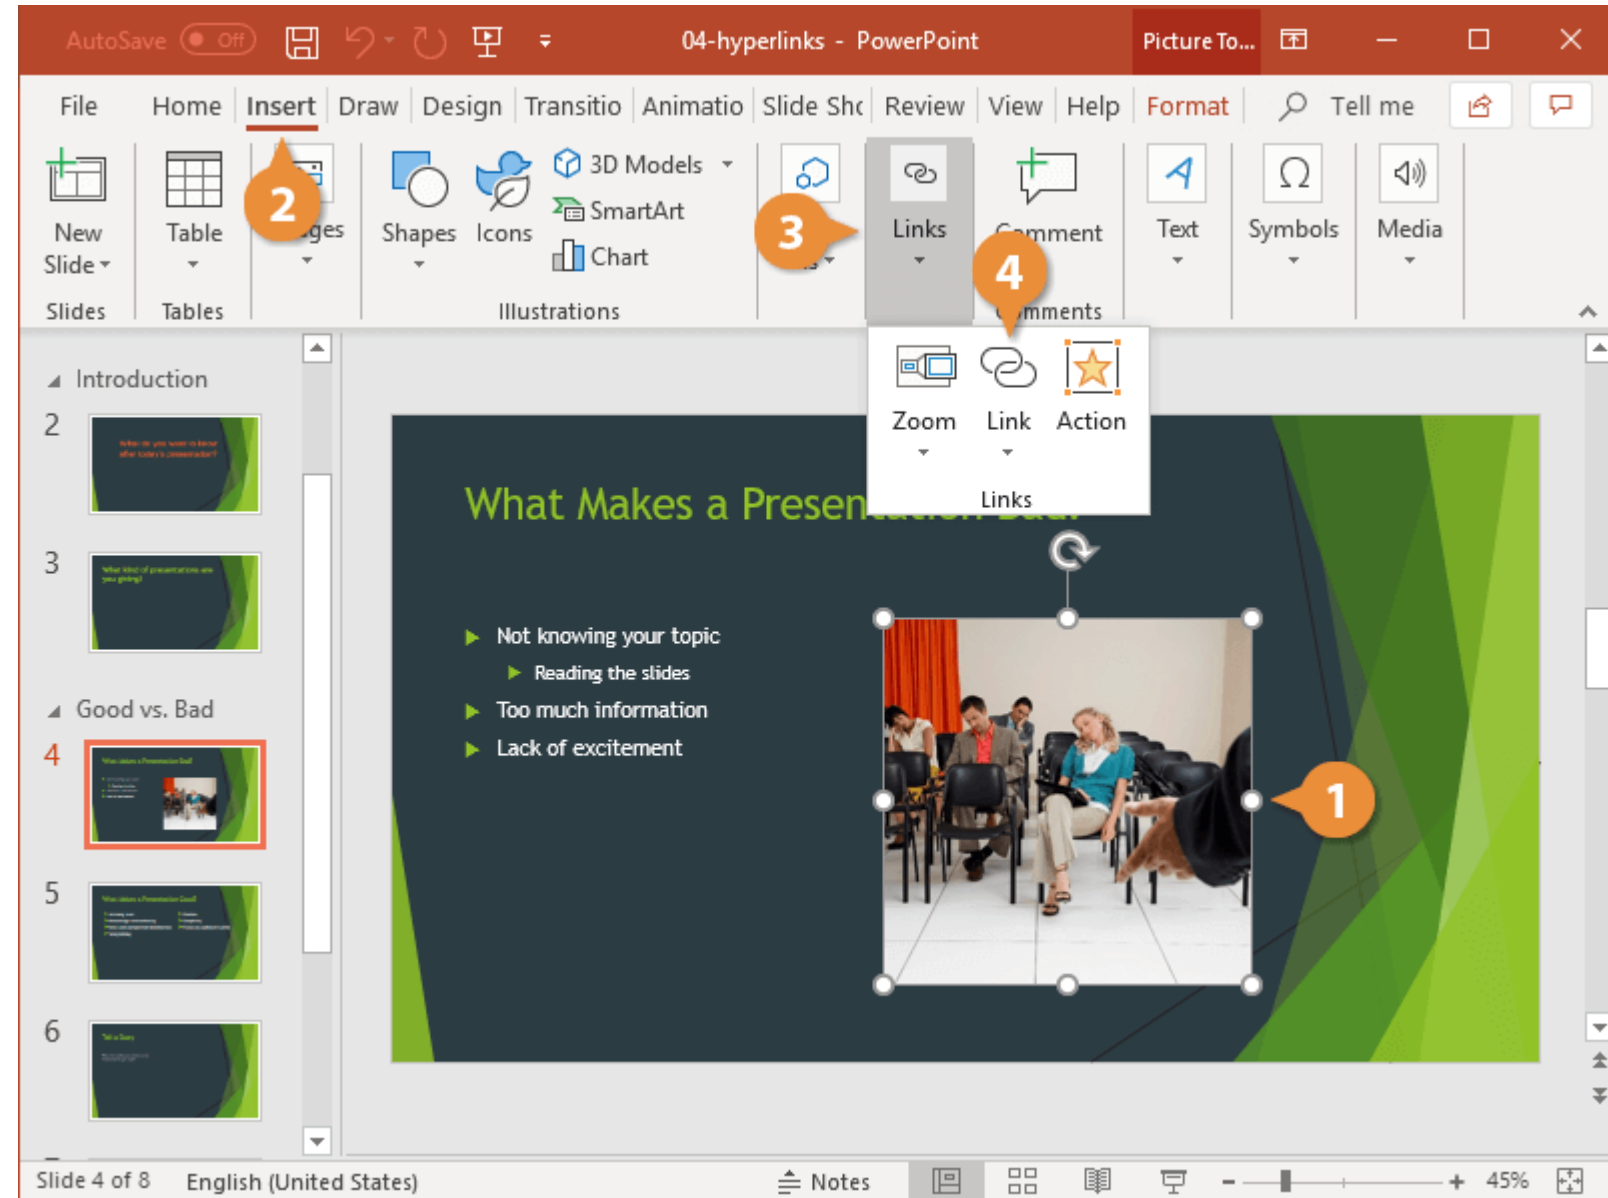

- Many, but not all, of the transitions in PowerPoint can be customized. Select the slide that has the transition you want to modify. On the Transitions tab, in the Transition to This Slide group, click Effect Options and select the option that you want.

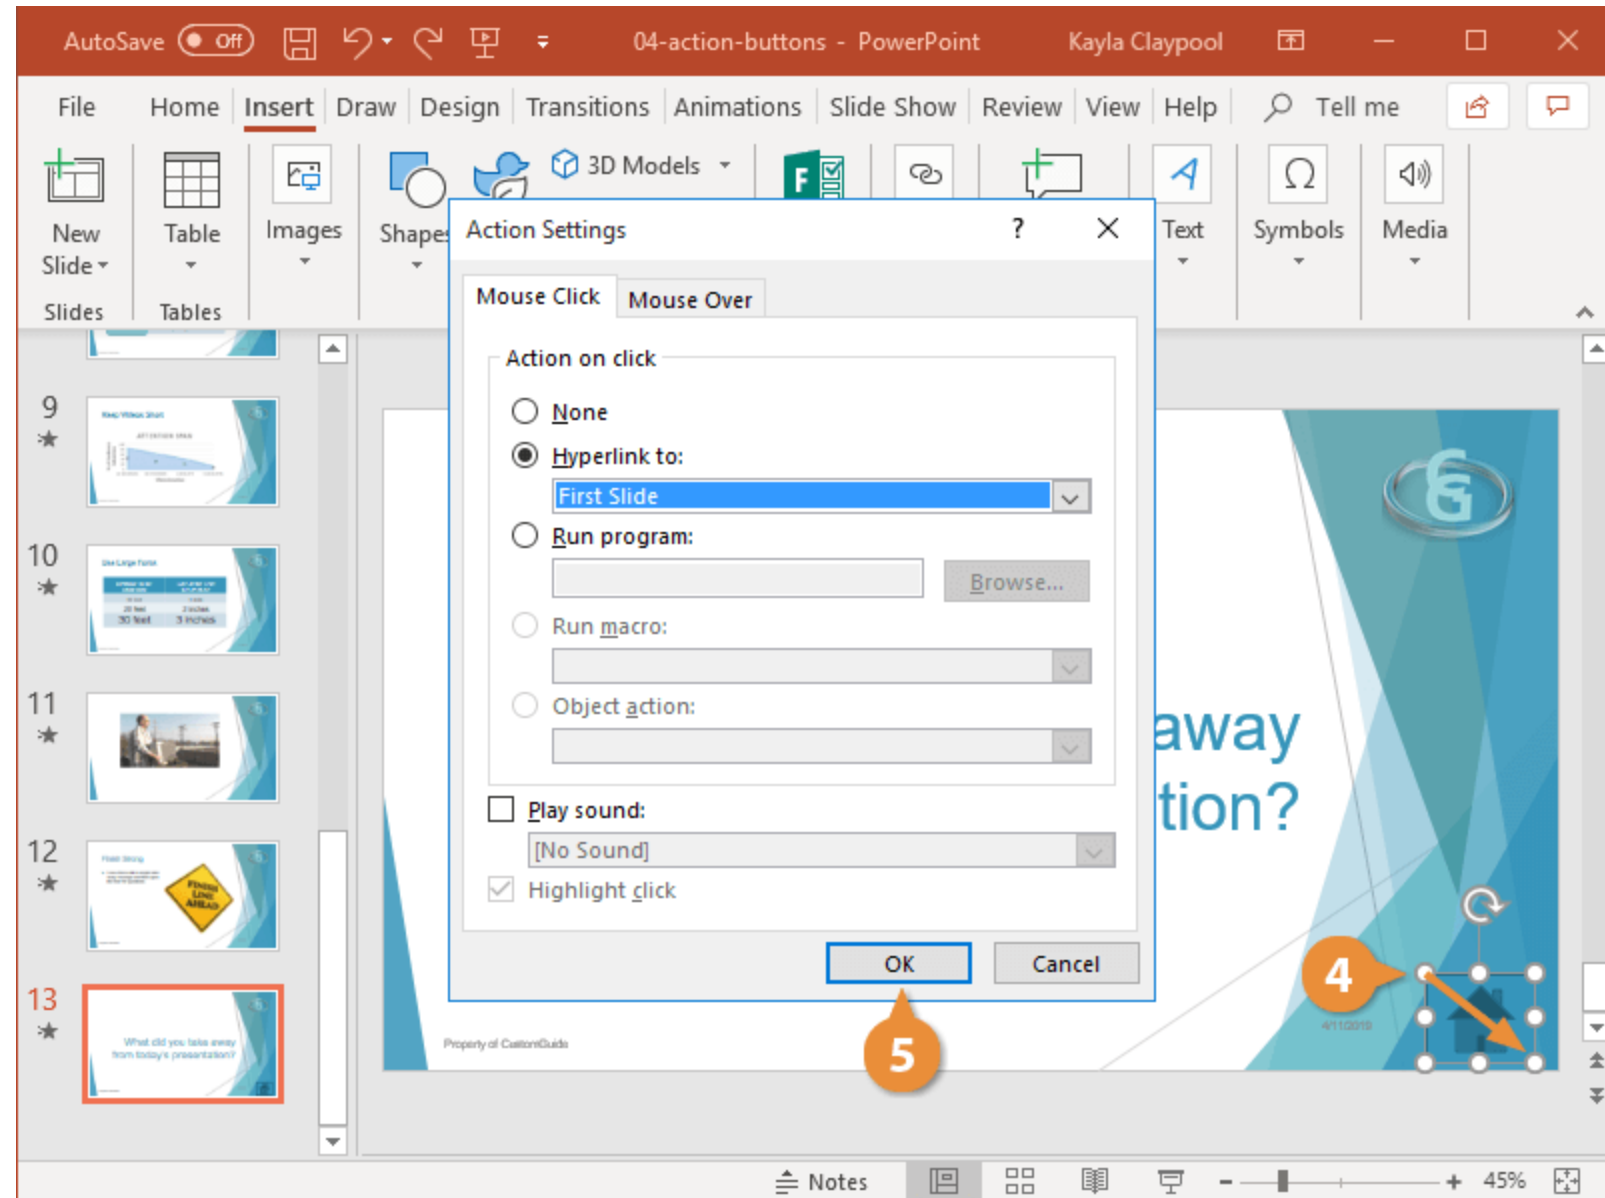

Insert a hyperlink

- On the slide, enter the text you want to turn into a hyperlink.
- Select the text.
- On the Insert tab of the ribbon, select Link.
- Select Insert Link. Or: You can make a link to a recently open file by selecting it from the Recent Items list that appears.
- Select Insert.

- Put an action button on your slide
- **On the Insert tab, click Shapes, and then under Action Buttons at the bottom of the menu, click the button shape that you want to add.** Click a location on the slide, and then drag to draw the shape for the button. Keep the dialog box open and go to the next procedure.

THANK YOU!
